DIRECTORS' REPORT

For the financial year ended 31 December 2022

The Directors present their annual report and audited financial statements of the Candoris ICAV (the "ICAV") for the financial year ended 31 December 2022.

The ICAV is constituted as an open-ended umbrella fund with segregated liability between Sub-Funds registered in Ireland on 6 March 2017 under the Irish Collective Asset-management Vehicles Act 2015 (as amended) (the "ICAV Act (as amended)") and authorised by the Central Bank of Ireland as an Undertakings for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations"). The ICAV's registration number is C166872.

The ICAV is organised in the form of an umbrella fund. Each sub-fund has a distinct portfolio of investments. As at 31 December 2022, the ICAV has four active sub-funds; SIM US High Yield Opportunities Fund launched on the 25 September 2017, Coho ESG US Large Cap Equity Fund launched on the 8 December 2017, Orchard US Small Cap Value Fund was launched on the 26 May 2020 and NCG US Small Cap Growth Fund launched on the 11 October 2022 (each a "Sub-Fund", collectively the "Sub-Funds").

Segregated Liability

The ICAV is an umbrella fund with segregated liability between the sub-fund and as such, as a matter of Irish Law, the assets of a Sub-Fund will not be exposed to the liabilities of the ICAV's other sub-funds.

Each sub-fund will be responsible for paying its fees and expenses regardless of the level of profitability. Notwithstanding the foregoing there can be no guarantee or assurance that, should an action be brought against the ICAV on a court of another jurisdiction, that the segregated nature of the Sub-Fund would necessarily be upheld.

Directors' Responsibilities Statement

The Directors are responsible for preparing the Directors' Report and audited financial statements of the ICAV, in accordance with applicable law and regulations.

The ICAV Act (as amended) requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU") and applicable law.

The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the ICAV at the end of the financial year and the decrease in the net assets attributable to holders of redeemable participating shares in the ICAV for the financial year. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

DIRECTORS' REPORT

For the financial year ended 31 December 2022 (continued)

Directors' Responsibilities Statement (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and the increase in the net assets attributable to holders of redeemable participating shares in the ICAV and enable them to ensure that the financial statements comply with the ICAV Act (as amended) and the UCITS Regulations. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the ICAV. In this regard, they have entrusted the assets of the ICAV to RBC Investor Services Bank S.A., Dublin Branch (the "Depository") for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act (as amended).

Review of Business and Future Developments

The results of operations are set out in the Statement of Comprehensive Income on pages 28 - 29. A detailed review of the development of the business and future developments is included within the Investment Manager's Reports on pages 11 - 19. The Directors do not anticipate any significant changes in the structure or investment objectives of the Sub-Funds. The ICAV will continue to act as an investment vehicle as set out in the latest Prospectus dated 22 July 2021 (the "Prospectus").

Distributions

It is the current intention of the Directors to declare dividends in respect of the distributing Classes of Shares.

The following dividend was declared on 31 January 2022 and paid on 7 February 2022:

Sub-Fund	Share class	Dividend per share
SIM US High Yield Opportunities Fund	Euro Hedged Institutional Class (Dis)	USD 5.11

The following dividend was declared on 29 January 2021 and paid on 5 February 2021:

Sub-Fund	Share class	Dividend per share
SIM US High Yield Opportunities Fund	Euro Hedged Institutional Class (Dis)	USD 6.17

Risk Management Objectives and Policies

The assets of each sub-fund will be invested separately in accordance with the investment objectives and policies of the Sub-Funds. The specific investment objective and policies of the Sub-Funds will be set out in the relevant Supplement and will be formulated by the Directors in consultation with the respective Investment Manager at the time of creation of the relevant Sub-Funds.

The investment objective of SIM US High Yield Opportunities Fund is to seek: (i) high current income; and (ii) capital appreciation.

The investment objective of Coho ESG US Large Cap Equity Fund is to achieve a return greater than the overall US equity market as defined by the S&P 500 Index by investing in US large cap and mid cap equities, while seeking to promote environmental, social and governance ("ESG") characteristics.

The investment objective of Orchard US Small Cap Value Fund is to seek long-term capital appreciation.

The investment objective of NCG US Small Cap Growth Fund is to seek long-term capital appreciation.

Details of the ICAV and the Sub-Funds' risk management objectives and policies are included in Note 9 of the financial statements.

DIRECTORS' REPORT

For the financial year ended 31 December 2022 (continued)

Principal Risks and Uncertainty

Investment in the ICAV carries with it a degree of risk including, but not limited to, the risks referred to in Note 9 to these financial statements.

Key Performance Indicators

The Directors consider that the change in Net Asset Value ("NAV") per share is a key indicator of the performance of the ICAV. Key performance indicators ("KPIs") monitored by the Directors include month to month movement in the NAV per share and the share capital movements.

Significant Events that Occurred during the Financial Year

On the 19 January 2022, the Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank. The Supplement was updated for the inclusion of the GBP Hedged Institutional Class (Cap) share class and confirmation that the Sub-Fund would commence hedging transactions.

On the 25 January 2022 the Manager announced that, subject to regulatory approval, it will become a member of the Waystone Group.

On the 31 January 2022, the ICAV's Instrument of Incorporation ("IOI") was updated due to the Investment Limited Partnerships (Amendment) Act 2020 amending the Irish Collective Asset-management Vehicles Act 2015 which required a UCITS ICAV to update the objects clauses included within the IOI.

In March 2023, the Directors have noted the developments in Ukraine and the sanctions being imposed on Russia by many countries as a result. Given the absence of exposure in the region, the Board of Directors' view is that those developments and sanctions are unlikely to have a significant direct adverse impact on the ICAV. Nonetheless, since the situation continues to evolve, it remains difficult at this stage to estimate all direct and indirect impacts which may arise from these emerging developments. The Board of Directors continues to monitor the developments closely and to take all the necessary actions.

On the 1 April 2022, the ICAV terminated the Privilège Management SA distributor agreement.

On the 28 April 2022, the Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank. The Supplement was amended for the following changes:

- The investment objective of the Sub-Fund was amended to make it clearer that Sub-Fund has sustainable investments as its objective;
- The inclusion of further information on sustainability indicators and specifically, how the Investment Manager integrates ESG factors into the investment process;
- Information has been included in the Supplement regarding the Investment Manager's consideration of environmental factors and the aim to reduce carbon footprint in the investment process by investing in the equity securities of companies that continuously improve on key environmental metrics; and
- The inclusion of a statement that the Fund is actively managed with reference to the S & P 500 solely by reason of the fact that the S&P 500 is referenced in marketing materials purely for performance comparison purposes.
- The total fixed total expense ratio for the Euro Retail Class was amended from 1.75% to 0.89%

On the 1 June 2022, the Supplement to the SIM US High Yield Opportunities Fund was noted by the Central Bank. The Supplement was updated to include the USDollar QI (Cap) share class.

NCG US Small Cap Growth Fund was authorised by the Central Bank on the 29 September 2022 and launched on the 11 October 2022.

DIRECTORS' REPORT

For the financial year ended 31 December 2022 (continued)

Significant Events that Occurred during the Financial Year (continued)

On the 28 October 2022, the Manager became a member of the Waystone group.

On the 11 November 2022, the updated Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank of Ireland. These changes related to the establishment of the GBP Distribution Class and the GBP Hedged Distribution Class.

On the 18 November 2022, the updated Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank of Ireland. This change related to the establishment of the SEK (Acc) Retail Class.

On the 1 December 2022, the Central Bank of Ireland noted the Level 2 SFDR Supplement updates for each of the Sub-Funds of the ICAV.

On the 1 December 2022, the Coho ESG US Large Cap Equity Fund was reclassified from an Article 9 fund to an Article 8 fund and the Central Bank of Ireland noted the change in the Funds' Investment Objective.

On the 1 December 2022, the SIM US High Yield Opportunities Fund was reclassified from an Article 6 fund to an Article 8 fund.

On the 12 December 2022, the registered address for the ICAV and Manager were amended to 35 Shelbourne Road, Ballsbridge, Dublin 2 with notifications issued to the Central Bank of Ireland and Companies Registration Office.

On the 20 December 2022, the Central Bank of Ireland noted updated Level 2 SFDR Supplement updates for the Coho ESG US Large Cap Equity Fund.

There were no other significant events occurred during the financial year.

Events since the Financial Year End

On the 19 January 2023, the Prospectus for the ICAV was noted by the Central Bank. The Prospectus was amended for the following changes:

- Cross-Border Distribution Funds Agreement: Candoris B.V. has been appointed to provide facilities required for cross-border distribution services, in respect of the ICAV and its sub-funds, pursuant to a Cross-Border Distribution Funds Agreement between the ICAV, the Manager and Candoris B.V. dated 26 August 2021, as may be amended from time to time.

On 27 April 2023, the Central Bank of Ireland noted the EU Taxonomy pre-contractual documents updates for each of the Sub-Funds Supplements of the ICAV.

There were no other significant events since the financial year end.

Employees

There were no other employees of the ICAV throughout the financial year.

Directors

The names and nationalities of the persons who were Directors at any time during the financial year are set in the Directory on page 3.

Directors' and Secretary Interests

The Directors and Secretary (including their families) did not have any shareholdings in the ICAV during the financial year ended 31 December 2022 (31 December 2021: none).

Details of transactions with related parties are discussed in Note 8.

DIRECTORS' REPORT

For the financial year ended 31 December 2022 (continued)

Connected Persons

The Central Bank of Ireland UCITS Regulations, 43(1) – Dealings by the management company or Depositary to a UCITS; and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary); and any associated or group company of such a management company, depositary, delegate or sub-delegate ("Connected Persons") states in paragraph one that any transaction carried out with a UCITS by these Connected Persons must be conducted at arm's length and in the best interests of the shareholders of the UCITS.

The Board of Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the UCITS Regulations are applied to all transactions with connected persons; and the Board of Directors are satisfied that transactions with connected persons entered into during the financial period complied with the obligations set out in this paragraph.

Adequate Accounting Records

To ensure that adequate accounting records are kept in accordance with the ICAV Act (as amended), the Directors of the ICAV have employed a service organisation, RBC Investor Services Ireland Limited (the "Administrator"). The accounting records are located at the offices of the Administrator at 4th Floor, One George's Quay Plaza, George's Quay, Dublin 2, Ireland.

Statement of Compliance on Corporate Governance

The ICAV has adopted in full the voluntary Corporate Governance Code for Irish domiciled collective investment schemes and management companies (the "Code") as published by Irish Funds, the text of which is available from Irish Funds website, www.irishfund.ie. The ICAV has been fully compliant with the Code for the year ended 31 December 2022 (31 December 2021: same).

Independent Auditors

Deloitte Ireland LLP have expressed their willingness to continue in accordance with Section 125(1) of the ICAV Act.

Signed on behalf of the Board

Brian Dunleavy
Director

Conor Hoey

**Report of the Depositary to the Shareholders
For the year ended 31 December 2022**

As required by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the Regulations") and solely within the context of our oversight duties as depositary, we are pleased to present our report as follows.

In our opinion, Candoris ICAV (the "ICAV") has been managed for the year ended 31 December 2022:

- (i) In accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the instrument of incorporation and the Regulations; and
- (ii) Otherwise in accordance with the provisions of the instrument of incorporation and the Regulations.

INVESTMENT MANAGER'S REPORT SIM US High Yield Opportunities Fund

For the financial year ended 31 December 2022

Performance

In 2022, the SiM US High Yield Opportunities Fund portfolio had a -7.12% return, net of fees, while the Bank of America US High Yield Index had a -11.22% return. Including hedging and net of fees, the SiM US High Yield Opportunities Fund portfolio had a -9.18% return while the Euro Hedged Bank of America US High Yield Index had a -13.40% return.

Overview of the Market

The ICE BofA US High Yield Index ended 2022 with a yield-to-worst of 8.99% and an Option Adjusted Spread ("OAS") of 481 bps, an annual increase of 467 and 171 bps respectively. The yield on the 2-year Treasury increased 367 bps, from 0.73% to 4.40%, while the 10-year Treasury increased 233 bps, from 1.50% to 3.83%. The trailing 12-month par-weighted High Yield default rate, including distressed exchanges, ended the year at 1.65%. The long term (30-year) average default rate for High Yield is 3.2%.

Full year 2022 new issuance totalled \$106.5bln, down 78% from the record high of \$483bln issued in 2021.

High Yield Bond funds had outflows of \$47bln (-\$8.7bln ETF) during the year compared to outflows of \$13.2bln (+\$1.1bln ETF) in 2021.

Performance rankings of asset classes were: Leveraged Loans 0.06%, 3-5 Year Investment Grade -8.14%, and 5-year Treasuries -9.77%, High Yield Bonds -11.22%, and S&P 500 -18.13%.

Returns by rating within High Yield Bonds were: double-B rated bonds -10.57%, single-B rated bonds -10.58%, and CCC & below-rated bonds -16.32%.

In the ICE BofAML High Yield Index the sectors with the best total returns were: Energy -5.48%, Transportation -6.09%, and Capital Goods -6.56%. The worst performing sectors were: Retail -17.16%, Healthcare -16.24%, and Media -15.83%.

Portfolio Update

Markets struggled in 2022 as inflation hit 40-year highs, prompting the Federal Reserve ("Fed") to aggressively raise interest rates, a surprise invasion of Ukraine by Russia, and Covid problems in China.

The outperformance vs the ICE BofA US High Yield Index can be attributed to security selection within Healthcare, Transportation, and Energy. Despite Healthcare being one of the poorest performing sectors during the year the Sub-Fund's exposure within Healthcare was in higher quality (rating) and less cyclical companies, which aided it on a relative basis. The Sub-Fund's exposure in Transportation was concentrated in various oil and bulk product shipping companies which experienced rate increases after the Russian invasion of Ukraine caused many shipments bound for Europe to be rerouted to India and China thus increasing overall ton mileage demand. Within Energy, the Sub-Fund's MLP investments performed particularly well as MLPs tend to be positively correlated to hydrocarbon prices, despite their businesses being rather immune to swings in hydrocarbon prices. We continue to see tremendous upside in these investments and believe their businesses will be very resilient in the event of a recession or economic pullback.

Year over year, the Sub-Fund increased its exposure to Energy, +5.0%, Financial Services +4.2%, and Real Estate +2.5% while decreasing its exposure to Healthcare, -5.5%, Consumer Goods -5.3%, and Capital Goods -3.2%.

INVESTMENT MANAGER'S REPORT Coho ESG US Large Cap Equity Fund

For the financial year ended 31 December 2022

Performance

From 1 January 2022 to 31 December 2022 the Coho ESG U.S. Large Cap Equity Fund portfolio returned a negative 6.78% (USD institutional shares), net of fees, while the S&P 500 Index was negative 18.12%.

The outperformance during this period was primarily due to our overweight and positive stock selection in the Consumer Staples and stock selection in Consumer Discretionary. Our overweight in Healthcare and underweight in the Technology sector also contributed to the relative performance. The Sub-Fund's relative performance was negatively impacted from the lack of exposure to Energy stocks, which outperformed during the period.

Portfolio Update

In January 2022, we eliminated our position in Unilever due to a Position Paper violation. In our discussions with management, we understood that large transformational deals were not a necessary part of the company's repositioning toward higher growth categories. However, the company announced its intention to acquire the consumer health joint venture of GlaxoSmithKline and Pfizer, a deal nearly half the size of Unilever's total market capitalization. Even though the company later walked away from the transaction, we had lost confidence in this management team's strategic vision and execution. Proceeds from the Unilever sale were used to increase our Dollar General and Sysco positions, which were performing at a high level with attractive risk/return profiles.

In April 2022, we initiated a new position in The Walt Disney Company ("DIS"). We believe DIS will be one of the long-term winners in the global media landscape as the industry shifts toward a future dominated by streaming services. We do not believe the path to that success will be linear. We have been monitoring the company's business model transition over the last several years to evaluate its progress while expecting some volatility along the way that could provide an investment opportunity at an attractive valuation. In mid-April, we believed we had reached that point. While there may be some additional volatility ahead, we view DIS as at the beginning stages of an earnings growth reacceleration that should lead to a resumption of capital returns to shareholders. As the direct-to-consumer streaming business matures it should result in stable and predictable revenue and cash flow. Additionally, we believed the market is underestimating the profitability of the Parks division that should also contribute to the reacceleration of earnings growth and provide a diversifying revenue and income stream. We subsequently added to our initial position in mid-May when shares experienced weakness due to the general market conditions and investor concern following a weak quarter for Netflix that included disappointing subscriber guidance. DIS, however, reported upside to its subscriber numbers when it reported and reiterated confidence in its long-term subscriber targets. Another area we are focused on is Parks profitability which achieved a record high for a F2Q. These items reflect positively on key components of our thesis, and we maintain our view that DIS will emerge as one of the dominant streaming platforms, will generate Parks profitability levels that exceed expectations, and that the company is at the early stages of a meaningful acceleration in earnings growth.

In July 2022, we eliminated our Automatic Data Processing ("ADP") position based entirely on our valuation discipline. ADP has performed very well since we purchased it during the pandemic, but employment has recovered and interest rates have begun to rise, which benefits the Funds Held for Clients (tax withholdings). All the good news appears to be priced into the stock.

We redeployed a portion of the funds into NIKE Inc. ("NKE"), a new position. NKE shares had been declining in price and the stock had been on our bullpen list. Investors were disappointed with the company's fiscal 4th quarter results and FY23 outlook. We believed execution in the quarter was good, considering an unexpected negative impact from lockdowns and inventory clearance in China, along with ongoing supply chain challenges. Management plans very conservatively and guidance incorporates additional actions to reduce inventory in China. We expect these issues to be transitory and see excellent value at these levels.

INVESTMENT MANAGER'S REPORT (continued) Coho ESG US Large Cap Equity Fund (continued)

For the financial year ended 31 December 2022

Portfolio Update (continued)

We subsequently added 50 basis points to our position in NIKE in September following stock price weakness related to a guidance reduction for gross margins and earnings per share ("EPS"). This was due to excess inventory in North American apparel that will be cleared. It resulted from late arrivals of seasonal inventory, early arrivals of holiday buys and a more promotional retail environment. Management expects this to be transitory and remains confident in long-term growth and margin drivers, including the Consumer Direct Acceleration strategy and international expansion. We believe management can manage through this challenging environment like they have done historically. The balance sheet remains very strong and capital returns to shareholders can continue.

In September 2022, we eliminated our position in Stanley Black & Decker. Our investment thesis in Stanley Black & Decker centered on the company tracking toward \$12-plus in EPS by 2022 through a combination of their leadership position in the tools industry, strong organic growth, and margin expansion through a combination of operating leverage and their partial ownership of (and option to fully acquire) outdoor power equipment provider MTD Holdings. There was an opportunity for portfolio simplification as former CEO Jim Loree set a 2-year timetable to either turn around their Security segment or pursue a sale.

Following our initial purchase, the company successfully navigated COVID-driven headwinds, with four straight quarters of double-digit organic growth and substantial margin expansion. They also acquired the rest of MTD and successfully divested their Security business. However, execution deteriorated thereafter with a substantial slowdown in organic growth and a significant decline in margins. Management also failed to set reasonable expectations for investors, which culminated in the 45% cut to initial FY 2022 EPS guidance (the second cut of the year) and the resignation of former CEO Loree, who was ultimately replaced by CFO Don Allan. New CEO Allan laid out an aggressive plan to restructure the business which focuses on a \$2 billion cost cutting plan and the possible sale of the company's Industrial segment to focus on the core Tools & Outdoor segment. We assign a below average probability toward this management team's ability to drive all of these cost savings. This and the recent track record of poor execution was deemed a position paper violation, and as such we exited our position in the stock.

In October 2022, we made the decision to eliminate our position in Kroger ("KR"). KR announced an acquisition of Albertsons which is a large and complex deal that will result in the addition of more than \$17 billion in debt to KR's balance sheet at a time when interest rates are rising. The deal is not expected to close until 2024 at the earliest and regulatory scrutiny could delay it longer, which adds further risk to the financing. In addition, KR has already suspended its buybacks (had been shrinking the share count 4% annually) and may not be in a position to resume for 2-3 years. The dividend will be maintained and increased over time, but the magnitude of any increases will moderate substantially from the past few years where it has grown 16-24%. Lastly, a deal of this size adds risk to KR's omnichannel strategy. Management guided to meaningful EPS accretion by year 4; however, we view the risks to achieving this as meaningful.

We used some of the KR funds to initiate a position in Baxter International (BAX). BAX is a health care equipment company with a durable portfolio of medically necessary everyday life saving products. The stock was off 38% from its high mainly due to supply chain and inflationary cost pressures. BAX has had problems sourcing chips and resin to make surgery products and while the supply chain challenges have not been alleviated, we do expect this to happen over the course of 2023. As these pressures resolve, we believe the company is well positioned to deliver on its 4% to 5% sales objective, with meaningful opportunity to increase the operating margin through 2025. The acquisition of HillRom about one year ago does add debt and integration risk as well as slows dividend growth in the near-term. Still, BAX offers a reasonable yield of over 2% today and once the deleverage objective has been met, the dividend should grow at or above the rate of earnings growth. The reward-risk and IRR are favourable following a 38% decline in the stock since February 2022.

We also made several trims to current positions based on valuation and added to holdings in the portfolio that had a better risk/reward. We believe all the transactions improved the portfolio's overall expected return while maintaining our goal of providing a lower level of risk relative to the broader market.

INVESTMENT MANAGER'S REPORT (continued) Coho ESG US Large Cap Equity Fund (continued)

For the financial year ended 31 December 2022

Outlook

As we ponder what lies ahead in 2023 and beyond, we remain cautious. We suspect the Federal Reserve ("Fed") will still need to boost the Fed Funds rate a few more times in hopes of taming inflation. However, we believe inflation will remain elevated, and we have already seen analysts begin to reduce their 2023 estimates for the S&P 500 Index. As such, our focus on attractively valued companies that can deliver consistent earnings growth with complementary dividend growth should produce good relative results in what remains an uncertain future.

On the ESG front, we recently updated our customized proxy voting guidelines, an annual process we performed in advance of the upcoming proxy season to reflect our proprietary corporate governance views, new proxy voting topics, and best practices for governance and sustainability. For director elections, we introduced additional sustainability and diversity factors that will be considered to strengthen board accountability for these matters. As it relates to executive compensation, we included additional specific compensation metrics for say-on-pay proposals to continue to promote a strong link between pay and performance. To further expand shareholder rights, we lowered our threshold when voting against shareholder proposals concerning the right to call special meetings from 25% to 20%. And finally, we will review the nature and prescriptive requirements of environmental and social shareholder proposals to ensure they are in the best interest of shareholders. We believe that thoughtful and responsible voting promotes board and management behaviours which, over the long term, minimise risks for our portfolio companies and have the potential to translate into superior shareholder returns.

Our strategy for the New Year will be no different than any other year. We will focus our research on understanding the long-term operating and financial strategies of the high-quality companies that we own and that we are considering for possible new investment. We will evaluate all these companies based on our dividend discount models and attempt to create a diversified portfolio with an attractive risk/return profile anchored by our valuation discipline. This process has been used since our inception, and it has produced solid risk-adjusted results over time. Past returns are no guarantee of future returns, but we believe our disciplines and practices could allow us to continue this historical pattern.

We will continue to review and update our customized voting guidelines annually to reflect our corporate governance views, new proxy voting topics, and best practices for governance and sustainability.

**INVESTMENT MANAGER'S REPORT
Orchard US Small Cap Value Fund**

For the financial year ended 31 December 2022

Annual Summary

During 2022, the Orchard US Small Cap Value Fund generated a net one year return of -21.8% vs the -19.0% for the Solactive GBS US Small Cap Index, and -14.48% for the US Small Cap Value Index. The Sub-Fund mildly outperformed the average of the Morningstar EEA US Small Cap Equity category, which was down 22.44%. The Sub-Fund's poor absolute performance was the result of poor performance in the first half of the year, followed by more modest catch up during the second half. We underperformed the value indexes, which frustrated us as we had constructed a relatively low price/earnings ("P/E"), low leverage portfolio of companies in our holdings that we believed would withstand both inflation and any shocks. Despite our best laid plans, our portfolio suffered, though the fundamental story of our underlying holding companies began to provide support in the second half of the year into the beginning 2023.

2022 Fund Net Performance vs

Trailing Returns

Total Return %	YTD
Investment	-21.80
Category	-22.44
Index	-14.48

Index: US Small cap Value Index. Category: Morningstar EEA Fund US Small-Cap Equity Data from Morningstar Direct

Portfolio Attribution and Update

Looking at sector and security attribution our top three sectors were Energy, Technology and Industrials. Both Energy and Technology were low weights. In Energy, our positive return was the only positive return in the sector, driven by strong performance from Solaris. Technology's outperformance was driven by allocation as our low weight kept us more protected from a very difficult period for the sector. Industrials was the third best sector and while we lost money in the sector, most of our holdings outperformed the average industrial in US Small Cap Value Index for the year.

Fund Contributors/Detractors by Sector

Leading Contributors Leading Detractors

Energy	Financial Services
Technology	Communication Services
Industrials	Real Estate

Note: Absolute Contribution to fund return by Morningstar Sector. Source from Orchard, Morningstar Direct

Our bottom three sectors were very frustrating. Financial services was the worst contributor to the portfolio. Axos, a holding that we still are very confident in, was the single worst contributor in our entire portfolio, though there were a variety of contributors in the sector – one that historically has provided us a significant source of absolute and relative outperformance. During the 2nd half of the year, some of these name rebounded significantly when earnings and prospects indicated that many of our banks were well suited to the interest rate environment, blunting the negative effects (Bancorp and Ameris actually ended up positively contributing for the year), though we remained behind for the year. Communication services was the second largest detractor as Lionsgate and Criteo both suffered. Lastly, our weak performance in Real Estate was entirely the result of poor performance in Digitalbridge, which was dragged partly by the pain felt in technology, its main client end market.

ESG Activity and Engagement

The year was an active one for ESG for the Firm. Most of this activity was in building out our expanded reporting infrastructure and in innovation toward furthering transparency in our universes. Our US Small Cap Value category remains one that has limited reporting. In a study of our portfolio, among the 33 Environmental sub scores provided by Bloomberg, only 9% were reported, either due to not reporting or inadequate data gathering. This, we have learned is a problem for the universe generally and even for the broader US stock category to some extent. We sought to further broaden our scoring and now compile Do No Harm Scoring on each of our portfolio companies along the 6 categories. We also have compiled additional data in Environmental and Social to supplement our already robust data and research in governance. When we found both third party and our expanded scoring difficult to act upon or find context, we engaged on two major endeavors:

INVESTMENT MANAGER’S REPORT (continued)
Orchard US Small Cap Value Fund (continued)

For the financial year ended 31 December 2022

ESG Activity and Engagement (continued)

1. Score the US Small Cap Value Universe – we gathered the scores, industries and industry groups of each company in US Small Cap Value Index Universe and aggregated custom scoring by industry and industry group and company.
2. Portfolio company Outreach: During December 2022, we began an outreach campaign with each of our portfolio companies where we produced a dashboard to share with each company its aggregate, disclosure and Do No Harm Scoring versus industry. We then offered to sit down with each company to explain discuss the value of reporting, transparency and improvement and to facilitate the process.

This outreach campaign is ongoing. We have contacted all portfolio companies and had a number of follow-up meetings in January. We expect to update our progress over time on both scoring and engagement. This program is meant to track companies' activities and their scoring over time. We also expect to see our and scoring metrics and reporting to clients and regulators to change over time as Europe and the US continue to develop their expectations. We do know, though, that transparency and reporting will aid us in any case and have made that a theme for each meeting in addition to any particular areas of interest specific to each company.

INVESTMENT MANAGER'S REPORT (continued) Orchard US Small Cap Value Fund (continued)

For the financial year ended 31 December 2022

Outlook

2022 was a difficult year for markets and specifically for our Strategy. As we mentioned, it was a tale of two halves. The 1st half was marked by terrible performance and frustration that even our best laid plans weren't working. The 2nd half rewarded us and our investors for a little patience with our best companies and despite further uncertainties and frustration, those challenges seemed normal – and much more manageable. 2023 starts the year with many known uncertainties: inflation, recession, Federal Reserve (“Fed”) tightening, Fed pivot, geopolitical uncertainty, energy insecurity and a host of other smaller issues. None of these concerns is likely to significantly derail value portfolios with low leverage and we see opportunities for both absolute and relative outperformance against other equity categories. Small Value remains historically cheap and well suited to an environment that still may challenge the high end of valuation but that has already delivered value stocks to long-term relative lows. At the same time, many of our domestically focused businesses are well suited to weathering the aftershocks of geopolitical events and trade issues. On the governmental and regulatory front, we expect to see infrastructure spending finally enter the execution stage. Regulatory agencies vary and have been increasingly obstructive or unable to act over the past two years. While we still remain watchful, this appears to be on the mend in the Food and Drug Administration and certain areas of the Financial Services and Interior/Energy agencies. Overall, we expect a somewhat volatile ride, but the skew now appears positive for many of our stocks.

Our guiding investment principles remain to seek companies that are undervalued, fundamentally sound, with conservative and proven management teams. Invest for the long-term. These principles hold true in all periods including 2023.

INVESTMENT MANAGER'S REPORT NCG US Small Cap Growth Fund

For the financial year ended 31 December 2022

Performance

During the period from 11 October 2022 (inception date) through 31 December 2022, the Next Century Growth US Small Cap Growth Fund was up 0.70% (gross of fees) compared to the US Small Cap Growth Index up 2.95%. The fourth quarter continued to be choppy, capping off a difficult year. The US Small Cap Growth index was positive in the first two months of the quarter as investors favourably responded to cooling monthly inflation data and the possibility of a Federal Reserve ("Fed") pivot to a less restrictive monetary policy. However, December delivered negative returns as the prospect for a Fed pivot was pushed out following another 50-basis point rate increase in mid-December and an outlook for continued increases in 2023, indicating the Fed's firm stance on taming persistently high inflation. This appeared to increase investors' concerns that the Fed's tightening actions would eventually lead to a significant slowdown in economic growth, which led to the sell-off at year end. The performance of Solactive GBS US Small Cap Index of 5.57% since inception until year end.

The relative underperformance during this period was due to Industrials and Financials, partially offset by strength in Healthcare. In Industrials, Chart Industries was a meaningful detractor to performance due to a poorly received acquisition. In Financials, Silvergate Capital was our worst performer due to weakness in the crypto currency space. TransMedics Group, a healthcare company, was a strong positive contributor during the period.

Portfolio Positioning

The portfolio is most overweight the healthcare sector as we believe a return to a more normalised operating environment after years of headwinds related to the pandemic will provide additional tailwinds to company fundamentals. The portfolio is also overweight the financial and industrial sectors as we seek to benefit from the unique individual growth drivers of our portfolio companies. We are about equal-weight in the Technology sector as we balance the attractive long-term secular growth in the industry versus a potential short-term slowdown in demand. Consumer Discretionary is one of the portfolio's largest underweights, although we have been adding to the sector as we have uncovered what we believe are some attractive risk/reward opportunities in the space.

Market Outlook

It is difficult to predict how 2023 will play out in the small cap growth space. However, the US Small Cap Growth Index was down 26.4% in 2022, one of the worst annual returns in the history of the index. The index also ended the year down over 34% from the peak in November 2021, which is a greater decline than average during a bear market. We believe the market has discounted much of the feared bad news and now could be a good time to invest in small cap growth stocks. Expectations are being lowered and valuations in this space are more attractive now than at any time in the recent past. In addition, small cap tends to lead in performance versus large cap coming out of bear markets. We are positioning for the time when the cloud's part for this asset class.

We are focused on adhering to our core investment philosophy. We believe a portfolio of high-quality growth companies, combined with a strong sell discipline, will lead to compounding of portfolio value over time. This has been the case since our inception, and we hope it continues in the future.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF CANDORIS ICAV

Report on the audit of the annual accounts

Opinion on the annual accounts of Candoris ICAV (the 'ICAV')

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2022 and of the loss for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable Regulations.

The annual accounts we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 20, including a summary of significant accounting policies as set out in note 3.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the annual accounts*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the annual accounts, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the annual accounts is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the annual accounts and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

/Continued on next page

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF CANDORIS ICAV

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of annual accounts that give a true and fair view and have been properly prepared in accordance with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the applicable Regulations

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the annual accounts to be readily and properly audited.

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF CANDORIS ICAV

- The annual accounts are in agreement with the accounting records.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

¹NCG US Small Cap Growth Fund launched on the 11 October 2022.

The accompanying notes form an integral part of the financial statements.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022

1. Reporting entity

The Candoris ICAV (the "ICAV") constituted as an open-ended umbrella fund with segregated liability between Sub-Funds registered in Ireland on 6 March 2017 under the ICAV Act (as amended) and authorised by the Central Bank of Ireland as an Undertakings for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations"). The ICAV's registration number is C166872.

The ICAV is organised in the form of an Umbrella Fund. Each sub-fund has a distinct portfolio of investments. As at 31 December 2022, the ICAV has four active sub-funds; SIM US High Yield Opportunities Fund launched on the 25 September 2017, Coho ESG US Large Cap Equity Fund launched on the 8 December 2017, Orchard US Small Cap Value Fund launched on the 26 May 2020 and NCG US Small Cap Growth Fund launched on the 11 October 2022 (each a "Sub-Fund", collectively the "Sub-Funds").

The investment objective of SIM US High Yield Opportunities Fund is to seek: (i) high current income; and (ii) capital appreciation.

The investment objective of Coho ESG US Large Cap Equity Fund is to achieve a return greater than the overall US equity market as defined by the S&P 500 Index by investing in US large cap and midcap equities, while seeking to promote environmental, social and governance ("**ESG**") characteristics.

The investment objective of Orchard US Small Cap Value Fund is to seek long-term capital appreciation.

The investment objective of NCG US Small Cap Growth Fund is to seek long-term capital appreciation.

2. Basis of preparation

The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), and Irish law comprising the ICAV Act (as amended) and the UCITS Regulations. The financial statements are prepared in on a going concern basis and presented in United States Dollar ("USD" or "\$"), the functional and presentation currency for both the ICAV and the Sub-Funds.

(b) Basis of measurement

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss. Fair value is the price that would be received in the purchase and sale of financial assets and financial liabilities or transferred to an equivalent party, other than in a liquidation sale. Financial assets and financial liabilities at fair value include investments in bonds and equities.

The Sub-Funds may from time to time invest in financial derivative instruments that are not traded in an active market (for example in over-the-counter derivatives such as forward contracts). The fair value of such instruments is determined by using various valuation techniques.

For open forward contracts, the unrealised gain or loss is calculated by reference to the difference between the contract rate and the rate to close out the contract as at the year end date. Realised gains or losses, which are recognised on the maturity of a contract, include net gains/(losses) on contracts which have been settled or offset by other contracts.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

2. Basis of preparation (continued)

(b) Basis of measurement (continued)

Realised gains or losses and changes in unrealised gains or losses are recognised in the Statement of Comprehensive Income. Unrealised gains and losses are included in the Statement of Financial Position.

(c) Use of estimates and judgements

The preparation of financial statements in conformity with IFRS as adopted by the EU, requires the Directors to make judgements, estimates and assumptions which affect the application of policies and the reported amounts of assets and liabilities, income and expense. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from other sources. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the financial year in which the estimates are revised and in any future years affected.

3. Significant accounting policies

(a) Financial assets and liabilities at fair value through profit or loss

(i) Classification

Pursuant to IFRS 9, the ICAV classifies its investments based on both the ICAV's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The ICAV is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions.

Equity, bond and derivatives instruments are measured at fair value through profit or loss unless, for equity and bond instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income. The ICAV has not taken the option to irrevocably designate any equity or bond securities as fair value through other comprehensive income.

(ii) Initial measurement

Financial instruments categorised at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being recognised immediately in the Statement of Comprehensive Income. Financial assets and financial liabilities not at fair value through profit or loss are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition or issue.

(iii) Subsequent measurement

After initial measurement, the ICAV measures financial instruments which are classified as at fair value through profit or loss, at their fair value. Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the Statement of Comprehensive Income. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is based on their quoted market prices in an active market. The ICAV measures instruments quoted in an active market at last traded price because this price provides a reasonable approximation of exit price.

If a quoted market price is not available, the fair value of the financial instruments may be estimated by a competent person using valuation techniques, including the use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

(iv) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire. It also derecognises a financial asset when it transfers the financial assets and the transfer qualifies for derecognition in accordance with IFRS 9. The ICAV derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

3. Significant accounting policies (continued)

(a) Financial assets and liabilities at fair value through profit or loss (continued)

(v) Expected credit loss

IFRS 9 replaces the 'incurred loss' model in International Accounting Standard ("IAS") 39 with a forward-looking 'expected credit loss' ("ECL") model. This may require considerable judgement about how changes in economic factors affect ECLs, which is determined on a probability-weighted basis.

The ICAV recognises loss allowances of ECLs on financial assets measured at amortised cost. The ICAV measures loss allowances at an amount equal to lifetime ECLs, except for the following which are measured at 12 months ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the ICAV considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the ICAV's historical experience and informed credit assessment and including forward-looking information.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12 months ECLs are the portion of ECLs that result from the default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the ICAV is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the ICAV expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the ICAV assesses whether financial assets carried at amortised cost are credit-impaired.

A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisations.

Presentation of allowance for ECLs in the Statement of Financial Position.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off

The gross carrying amount of financial assets is written off when the ICAV has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. There was no impact on current disclosures in the ICAV's financial statements.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

3. Significant accounting policies (continued)

(b) Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. There were no master netting agreements in place for the financial years ended 31 December 2022 or 31 December 2021. As a result, the requirements of IFRS 7 to disclose offsetting positions of financial assets and liabilities have no impact on current disclosures in the ICAV's financial statements.

(c) Transaction costs

Transaction costs are incremental costs which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. The Sub-Fund's portfolio transactions include the purchase and sale of bond and equities and the increase or decrease in notional amount of derivative contracts.

(d) Net gains/(losses) on financial assets and liabilities at fair value through profit or loss

Net gains/(losses) from financial assets and financial liabilities at fair value through profit or loss includes all realised and unrealised fair value changes and foreign exchange differences.

(e) Income tax

Dividend, interest income and capital gains (if any) received by the Sub-Funds might be subject to withholding tax imposed in the country of origin. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as tax expense in the Statement of Comprehensive Income.

(f) Functional and presentation currency

The functional currency of the Sub-Funds is United States Dollar ("USD"). The functional currency choice is based on the active currency of each Sub-Fund. The presentational currency of the ICAV is USD. Foreign currency assets and liabilities are translated into USD at the exchange rate ruling at the financial year end. The cost of investment securities expressed in currencies other than USD are translated into USD at the exchange rate prevailing at the purchase date.

Transactions in foreign currencies are translated into the functional currency of the Sub-Funds at the exchange rate at the date of the transaction. The portion of realised gains and losses on sale of investments that result from changes in the foreign exchange rates between the date of purchases and sales are included in 'net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss' in the Statement of Comprehensive Income.

The rates of exchange at 31 December 2022 for USD were:

Canadian Dollar ("CAD")	0.738552	British Pound Sterling ("GBP")	1.208950
Euro ("EUR")	1.070450	Danish Krone ("DKK")	0.143951
Swiss Franc ("CHF")	1.081490		

The rates of exchange at 31 December 2021 for USD were:

Canadian Dollar ("CAD")	0.790545	British Pound Sterling ("GBP")	1.353550
Euro ("EUR")	1.138500	Mexican Peso ("MXN")	0.048839
Swiss Franc ("CHF")	1.097454	Danish Krone ("DKK")	0.153091

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

3. Significant accounting policies (continued)

(g) Redeemable participating shares

All redeemable shares issued by the Sub-Funds of the ICAV provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Sub-Fund's net assets at the redemption date. In accordance with IAS 32 'Financial Instruments: Presentation', such instruments are classified as financial liabilities. Subject to the terms of the Prospectus, the Sub-Funds are contractually obliged to redeem shares at the Net Asset Value ("NAV") per share on the valuation date.

(h) Cash and cash equivalents

Cash and cash equivalents comprise current deposits with the Depositary. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes.

(i) Interest income and bank interest

Guidance on the recognition and presentation of interest and dividend income now falls within the scope of IFRS 9. A consequential amendment to IAS 1 'Presentation of Financial Statements' has clarified that only interest income from financial assets held at amortised cost can be presented within interest income within the Statement of Comprehensive Income. The Sub-Funds' interest income from financial assets held at fair value through profit or loss is recorded as part of 'net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss' within the Statement of Comprehensive Income.

Interest income is recognised in the Statement of Comprehensive Income on an accrual basis, using the effective interest method. The effective interest method is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or when appropriate; a shorter period) to the carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Sub-Funds estimate future cash flows considering all contractual terms but not future credit losses. Bank interest is recognised on an accruals basis in line with the contractual terms. Interest is accrued on a daily basis.

(j) Dividend income

Dividend income is recognised in the Statement of Comprehensive Income on the date upon which the related security is first listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes and net of any tax credits.

(k) Net asset value per share

The NAV per share is calculated by the Administrator, dividing the NAV of each class of shares by the shares in issue of each class of shares.

(l) Fees and expenses

All expenses are recognised in the Statement of Comprehensive Income on a fixed fee basis. For further information on all fees and expenses charged to the Sub-Funds, please see Note 7 of these financial statements and the ICAV's Prospectus and relevant Supplements.

(m) Distributions

It is the current intention of the Directors to declare dividends in respect of the distributing Classes of Shares of the SIM US High Yield Opportunities Fund and Coho ESG US Large Cap Equity Fund. Dividends may be paid out of net income (including dividend and interest income) and the excess of realised and unrealised capital gains net of realised and unrealised losses in respect of investments of the relevant Sub-Fund.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

3. Significant accounting policies (continued)

(m) Distributions (continued)

Dividends will usually be declared annually on the last business day in January (or at a time and frequency to be determined at the discretion of the Directors following prior notification to the Shareholders) and will be distributed five business days later to the Shareholder of record as of the date of declaration of the dividend.

(n) Receivable on sales of securities and payable on purchases of securities

Receivable on sales of securities represent receivables for securities sold that have been contracted for but not yet settled or delivered on the reporting date. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade.

Payable on purchases of securities represent payables for securities purchased that have been contracted for but not yet settled or delivered at the reporting date. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade.

(o) Receivable on subscriptions and payable on redemptions

Receivable on subscriptions represent the amounts due from investors for subscriptions that have been contracted for but not yet received and therefore are shown as a receivable at the financial year end.

Payable on redemptions represent amounts due to investors for redemptions that have been contracted for but not yet paid and therefore are shown as a payable at the financial year end.

(p) Umbrella cash account

Cash account arrangements have been put in place in respect of the ICAV and the Sub-Funds as a consequence of the introduction of requirements relating to subscriptions and/or redemption collection accounts. These cash accounts are not subject to the protections of the Investor Money Regulations and instead will be subject to the guidance issued by the Central Bank from time to time in relation to umbrella cash accounts.

Investors monies may be held in an umbrella cash account in respect of each currency in which a class is denominated. The assets in the umbrellas cash account will be assets of the relevant Sub-Fund.

(q) Swing pricing

Swing pricing is a mechanism used to adjust the NAV per share for a Sub-Fund in order to reduce the effect of dilution on that Sub-Fund. Dilution occurs where the actual cost of purchasing or selling the underlying assets of a Sub-Fund deviates from the value of these assets in a Sub-Fund's assets due to dealing costs, charges and market spread. Details of swing pricing are discussed in Note 6.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

4. New accounting pronouncements amendments and interpretations

New standards, amendments and interpretations adopted for these financial statements effective 1 January 2022

Up to the date of issue of these audited financial statements, the International Accounting Standard Board (“IASB”) has issued a number of amendments, new standards and interpretations which are effective for the year beginning 1 January 2022 and which have been adopted in these audited financial statements, where relevant.

Reference to the Conceptual Framework – Amendments to IFRS 3

Minor amendments were made to IFRS 3 Business Combinations to update the references to the Conceptual Framework for Financial Reporting and add an exception for the recognition of liabilities and contingent liabilities within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets and Interpretation. The amendments also confirm that contingent assets should not be recognised at the acquisition date.

Onerous Contracts – Cost of Fulfilling a Contract Amendments to IAS 37

The amendment to IAS 37 clarifies that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract.

Annual Improvements to IFRS Standards 2018-2020

The following applicable improvements were finalised in May 2020:

- IFRS 9 Financial Instruments clarifies which fees should be included in the 10% test for derecognition of financial liabilities.

The amendments and improvements noted above are effective from 1 January 2022 and the ICAV has adopted these, where relevant, and it has not resulted in any change to the presentation of these financial statements.

New or revised accounting standards and interpretations that have been issued but not yet effective for the period ended 31 December 2022

The standards, amendments and interpretations that are issued, but not yet effective are disclosed below, except for those standards which, in the opinion of the Board of Directors, will clearly not impact the ICAV. The ICAV intends to adopt these standards, where applicable, when they become effective.

Effective for accounting period beginning on or after

	Effective for accounting period beginning on or after
Amendments to IAS 1: Presentation of Financial Statements and IFRS Practice Statement 2: Disclosure of Accounting policies	1 January 2023
Amendments to IAS 8: Accounting policies, changes on Accounting Estimates and Errors	1 January 2023

None of these are expected to have a material effect on the financial statements of the ICAV.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

5. Taxation

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997 (as amended) ("TCA"). The ICAV and its Sub-Funds will not be liable to Irish tax in respect of its income or gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a "Relevant Period". A "Relevant Period" being an eight year period beginning with the acquisition of the shares by the shareholders and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- i) A shareholder who is not an Irish resident and not resident in Ireland at the time of the chargeable event provided the necessary signed statutory declarations are held by the ICAV and its Sub-Fund; or
- ii) Certain exempted Irish resident investors who have provided the ICAV and its Sub-Fund with the necessary signed statutory declarations; or
- iii) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- iv) An exchange of shares representing one Sub-Fund for another Sub-Fund of the ICAV; or
- v) An exchange of shares arising on a qualifying amalgamation or restructuring of the ICAV with another ICAV; or
- vi) Certain exchanges of shares between spouses and former spouses.

In the absence of an appropriate declaration, the ICAV or its Sub-Funds will be liable to Irish tax on the occurrence of a chargeable event. There was no chargeable event during the year ended 31 December 2022 (31 December 2021: none).

Capital gains, dividends and interest received by the Sub-Funds may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Sub-Funds or its shareholders.

6. Share capital

Authorised shares

The authorised share capital of the ICAV is 2 subscriber shares ("subscriber shares") of €1.00 each and 1,000,000,000 shares of no par value initially designated as unclassified shares and available for issue as shares.

The issued share capital of the ICAV is €2.00 represented by 2 subscriber shares issued for the purpose of incorporation of the ICAV at an issue price of €1.00.

The right of holders of any shares to participate in the assets of the ICAV is limited to the assets (if any) of the Sub-Funds relating to such shares. If the net assets of any Sub-Fund are insufficient to pay any amounts due on the relevant shares in full in accordance with the Supplement and the Instrument, the relevant shareholders will have no further right of payment in respect of such shares or any claim against any other Sub-Fund or any other assets of the ICAV. Each shareholder's right to any return of capital or income on the shares is subject to the Prospectus, the relevant Supplement and the Instrument generally.

If a Sub-Fund has two or more classes of shares, the claims of the holders of such classes to the assets of the relevant Sub-Funds will, subject to the terms of the relevant Sub-Funds, rank *pari passu* with each other, and, on a winding-up of the ICAV, the holders of each such class will participate in the assets (if any) comprised in such Sub-Funds *pro rata* to the amount paid up on the shares of each such class.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

6. Share capital (continued)

Authorised shares (continued)

Each separate class relating to one Sub-Fund will have recourse only to the assets comprised within the relevant Sub-Fund. Consequently, if on the termination of a Sub-Fund or on the winding-up of the ICAV, the assets of a Sub-Fund (after payment of all fees, expenses and other liabilities (other than amounts owing to shareholders) which are to be borne by such Sub-Fund) are insufficient to pay the full repurchase proceeds payable in respect of all classes of shares relating to the relevant Sub-Fund, the proceeds of the relevant Sub-Fund will be distributed equally amongst each shareholder of the relevant Sub-Fund pro rata to the amount paid up on the shares held by each shareholder.

Subscription of shares

The ICAV operates a single omnibus subscriptions/redemptions account for each of the Sub-Funds, so that the amounts within the subscriptions/redemption account are at all times capable of being attributed to the individual Sub-Funds in accordance with the Instrument. Accordingly, monies in the subscription/redemptions account will become the property of the relevant Sub-Funds upon receipt and accordingly in the event of the insolvency of the ICAV or the relevant Sub-Funds investors will be treated as an unsecured creditor of the ICAV during the period between receipt of subscription monies and the dealing day on which such shares are issued. Investors' attention is drawn to the risk factor under the heading "Subscriptions/Redemptions Account Risk". Furthermore, the operation of the Subscriptions/Redemptions account will not compromise the ability of the Depositary to carry out its safe-keeping and oversight duties in accordance with the UCITS Regulations. In addition, in circumstances where subscription monies are received with insufficient documentation to identify the owner, the Manager and the Depositary will ensure that in the event that such monies cannot be applied to the individual Sub-Fund they will be returned to the payer within 5 working days.

Subscription price

During the initial offer period for each Sub-Fund, the initial issue price for shares in the relevant Sub-Fund shall be the amount set out in the Supplement for the relevant Sub-Fund.

The issue price at which shares of each Sub-Fund are issued after the initial offer period is calculated by ascertaining the net asset value ("NAV") per share of the relevant class on the relevant dealing day.

A preliminary charge of up to 5% of the initial issue price or the NAV per share, as appropriate may be provided for in the relevant Supplement and charged by the ICAV for payment to one or more third parties including distributors on the issue of shares, out of which such third party including a distributor may, for example, pay commission to other third parties including sub-distributors. The amount of the preliminary charge, if any, will be set out in the relevant Supplement.

The initial issue price of each class of shares in the Sub-Funds are listed below:

	Initial Issue Price
SIM US High Yield Opportunities Fund	
US Dollar Institutional Class (Cap)	USD 100.00
Euro Hedged Institutional Class (Dis)	EUR 100.00
Euro Hedged Institutional Class (Cap)	EUR 100.00

*NCG US Small Cap Growth Fund and the Class I1 Shares launched on the 11 October 2022.

Anti-dilution levy

Effective to 22 July 2021, the Directors of the ICAV had the ability to apply an anti-dilution levy ("ADL") to the subscription price per share on the SIM US High Yield Opportunities Fund. On any dealing day where the Sub-Fund had overall net subscriptions, an adjustment was applied to the subscription price by adding an ADL, for retention as part of the assets of the Sub-Fund, to cover dealing costs and to preserve the value of the Sub-Funds' underlying assets. The ADL was typically up to 0.40% of the NAV per share of the relevant class, but may in exceptional or distressed market conditions be up to 2% of the NAV per share of the relevant class. SIM US High Yield Opportunities Fund was the only Sub-Fund charging the ADL. No levies were charged during the year (31 December 2021: USD198,277).

Swing pricing

Effective from the 23 July 2021, the Directors of the ICAV adopted a swing price mechanism for the SIM US High Yield Opportunities Fund. Swing pricing is used to adjust the NAV per share for the Sub-Fund in order to reduce the effect of dilution on the Sub-Fund. Dilution occurs where the actual cost of purchasing or selling the underlying assets of a Sub-Fund deviates from the value of these assets in a Sub-Fund's assets due to dealing costs, charges and market spread.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

6. Share capital (continued)

Swing pricing (continued)

On any dealing day, where there are net redemption or subscription requests above a threshold as determined by the Directors, the valuation of the underlying assets may switch to a bid basis in the case of net redemptions and to an offer basis in the case of net subscriptions. In such circumstances, the NAV on that particular dealing day may be adjusted by an amount determined by the Manager (upwards in the case of net subscriptions and downwards in the case of net redemptions) to reflect the dealing costs which may be incurred by the Sub-Fund and any anticipated fiscal charges and the estimated bid/offer spread of the underlying assets (the "Swing Factor"). The Swing Factor is dependent on anticipated spreads in the market for the underlying assets in the relevant Sub-Fund and determined by the Directors.

Where swing pricing has been implemented in respect of a particular Sub-Fund, an anti-dilution levy will not be applied.

During the financial year ending 31 December 2022, there were no NAV adjustments for swing pricing on SIM US High Yield Opportunities Fund.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

7. Fees and expenses

Fixed fees

The ICAV employs a fixed fee structure for SIM US High Yield Opportunities Fund, Coho ESG US Large Cap Equity Fund and Orchard US Small Cap Value Fund. The fees and out-of-pocket expenses of the Manager, the Investment Manager, the Advisory and Marketing Support Agent, the Administrator, the Depositary, the relevant portion of the Directors' fees payable by the ICAV which have been allocated to each Sub-Fund, administrative expenses of the Sub-Funds, sub-depositary fees (which shall be charged at normal commercial rates), the regulatory levy of the Sub-Funds, establishment costs, registration costs and other administrative expenses shall be discharged out of the Fixed Total Expense Ratios ("Fixed TER") specified below.

The Fixed Management Fee covers the fees and out-of-pocket expenses of the Manager, Investment Manager and Advisory and Marketing Support Agent. The Fixed Currency Hedging Fee is payable to the Administrator in respect of the implementation of the share class currency hedging arrangements. The other fees and expenses listed above will be paid out of the Fixed Service Fee.

In circumstances, where the other fees and expenses accrued by a Sub-Fund, which are listed above as being paid out of the Fixed Service Fee, exceed the Fixed Service Fee percentage, as set out below, those excess other fees and expenses shall be discharged from the Fixed Management Fee payable out of the assets of the applicable Sub-Fund before it is paid to the Manager, Investment Manager and Advisory and Marketing Support Agent and the amount remaining for payment to such parties shall be reduced accordingly.

For the avoidance of doubt, the Fixed Management Fee, Fixed Service Fee and Fixed Currency Hedging Fee comprising the Fixed TER specified below are payable out of the assets of the Sub-Fund at the levels specified below in all cases, including for example where the fees and out-of-pocket expenses of the Manager, Investment Manager and Advisory and Marketing Support Agent are less than the Fixed Management Fee and/or where the other fees and expenses listed above as being paid out of the Fixed Service Fee are less than the Fixed Service Fee.

Fixed Management Fee, Capped Service Fee and Capped TER

The ICAV employs a capped fee structure for the NCG US Small Cap Growth Fund. The maximum management fee covers the fees and out-of-pocket expenses of the Manager, the Investment Manager and the advisory support services of the Advisory and Marketing Support Agent (the "Fixed Management Fee"). The other fees and expenses listed above will be paid out of a capped service fee (the "Capped Service Fee").

In circumstances where the other fees and expenses accrued by the Sub-Fund, (excluding the Fixed Management Fee) exceeds the Capped Service Fee set out below, the excess other fees and expenses shall be discharged from the Fixed Management Fee payable out of the assets of the Sub-Fund, before it is paid to the Manager, Investment Manager and Advisory and Marketing Support Agent and the amount remaining for payment to Advisory and Marketing Support Agent shall be reduced accordingly. Where the actual fees, costs and expenses accrued by the Fund are greater than the Fixed Management Fee and/or the Capped Service Fee, the excess costs above the Capped TER will be paid by the Advisory and Marketing Support Agent.

For the avoidance of doubt, the Fixed Management Fee is payable out of the assets of the Sub-Fund at the levels specified below in all cases, including, for example, where the fees and out-of-pocket costs and expenses of the Manager, Investment Manager and Advisory and Marketing Support Agent are less than the Fixed Management Fee. In circumstances, where the actual fees, costs and expenses attributable to the Fixed Management Fee are less than the Fixed Management Fee, the balance will firstly be used to discharge the Capped Service Fee as described above and any remaining balance (if any) will be returned to the account of the relevant Share Class. In circumstances where the actual fees, costs and expenses attributable to the Capped Service Fee are less than the Capped Service Fee any remaining balance (if any) will be returned to the account of the relevant Share Class. In no circumstances will fees and expenses be carried forward. The NCG US Small Cap Growth Fund is following Capped Service Fee.

NCG US Small Cap Growth Fund¹	Class Retail
Fixed Management Fee	1.50% of NAV
Capped Service Fee	0.20% of NAV
Capped TER	1.70% of NAV

¹NCG US Small Cap Growth Fund launched on the 11 October 2022.

The Fixed Management Fee, Fixed Service Fee and Capped Service Fee will accrue daily and are payable quarterly in arrears out of the assets of the Sub-Funds. For the financial year ended 31 December 2022, the Fixed Management Fee charged for all Sub-Funds amounted to USD6,444,917 (31 December 2021: USD5,663,426), of which USD2,291,123 remains payable at 31 December 2022 (31 December 2021: USD1,871,558).

For the financial year ended 31 December 2022, the Fixed Service Fee charged for against the relevant Sub-Funds amounted to USD1,437,877 (31 December 2021: USD1,261,567), of which USDNil remains payable at 31 December 2022 (31 December 2021: USDNil).

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

7. Fees and expenses (continued)

Fixed Management Fee, Capped Service Fee and Capped TER (continued)

For the financial year ended 31 December 2022, the Capped Service Fee charged to NCG US Small Cap Growth Fund amounted to USD6,960 (31 December 2021: USDNil) and USD2,753 remains payable as at 31 December 2022 (31 December 2021: USDNil).

Management Fee

KBA Consulting Management Limited (the “Manager”), is entitled to receive a Management Fee out of the assets of the Sub-Funds. The management fee shall be accrued daily in the Fixed Management Fee of the Sub-Fund and shall be payable quarterly in arrears of the assets of the Sub-Funds. The Manager will also be entitled to be reimbursed out of the assets of the Sub-Funds for all its own reasonable out-of-pocket costs and expenses at normal commercial rates.

For the financial year ended 31 December 2022, the fees charged by the Manager were USD262,682 (31 December 2021: EUR201,149), of which USD72,996 remains payable at 31 December 2022 (31 December 2021: EUR58,212).

Directors’ fees

Unless and until otherwise determined from time to time by the ICAV in general meeting, the ordinary remuneration of each Director shall be determined from time to time by resolution of the Directors. Any Director who is appointed as an executive director (including for this purpose the office of chairman or deputy chairman) or who serves on any committee, or who otherwise performs additional services as a Director, may be paid such extra remuneration by way of fees, commission or otherwise as the Directors may determine. For the financial year ended 31 December 2022, the fees charges by the Directors were EUR50,000 (31 December 2021: EUR50,000), of which EURNil remains payable at 31 December 2022 (31 December 2021: Nil).

Auditor’s remuneration

	31 December 2022	31 December 2021
	EUR	EUR
Audit of statutory financial statements (ex VAT)	32,250	20,450
Other assurance services	-	-
Tax advisory services	-	-
Other non-audit services	-	-
Total	32,250	20,450

For the financial year ended 31 December 2022, the Audit Fee amounted to EUR32,250 remains payable at 31 December 2022 (31 December 2021: EUR20,450).

8. Related parties

International Accounting Standard (“IAS”) 24 ‘Related Party Disclosures’ requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity. The Directors, the Manager, the relevant Investment Manager and Candoris B.V. (as Advisory and Marketing Support Agent of the ICAV), represent related parties for the purposes of the accounting standards to which the ICAV is subject.

Transactions with parties with significant influence

Manager

KBA Consulting Management Limited is the ICAV’s Manager under the Management Agreement.

The Money Laundering Reporting Officer (“MLRO”) and Secretary of the ICAV are employees of KB Associates which is part of the same economic group as the Manager.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

8. Related parties (continued)

Investment Manager

The ICAV and the Manager have appointed Coho Partners, Ltd, Strategic Income Management, LLC, Orchard Capital Management, LLC and Next Century Growth Investors, LLC as investment managers to the Sub-Funds pursuant to Investment Management Agreements between the ICAV, the Manager and each of the Investment Managers (the “Investment Management Agreements”). The Investment Management Agreements were dated on 28 August 2017 for Coho Partners, Ltd and Strategic Income Management, LLC, 13 March 2020 for Orchard Capital Management, LLC and 29 September 2022 for Next Century Growth Investors, LLC.

Advisory and Marketing Support Agent

Candoris B.V. (the “Advisory and Marketing Support Agent”) has been appointed by the ICAV and the Manager to: (i) provide advisory support services in respect of the Sub-Fund pursuant to the terms of an Advisory Support Agreement between the ICAV, the Manager and the Advisory and Marketing Support Agent; and (ii) provide marketing support services in respect of the Sub-Fund pursuant to the terms of a Marketing Support Agreement between the ICAV, the Manager and the Advisory and Marketing Support Agent (together the Advisory and Marketing Support Agreements). The Advisory and Marketing Support Agreements were dated on 28 August 2017 for Coho Partners, Ltd and Strategic Income Management, LLC and 13 March 2020 for Orchard Capital Management, LLC and 29 September 2022 for Next Century Growth Investors, LLC.

Transactions with Key Management Personnel

Dirk van de Kamp and Martijn van Vliet, Directors of the ICAV, are also Partners and Directors of the Advisory and Marketing Support Agent.

Brian Dunleavy, a Director of the ICAV, is also an employee of KBA Consulting Management Limited, who acts as Manager to the ICAV.

Please see Note 7 for other related party fees charged during the year.

The following shareholders hold over 25% of the value of the Sub-Funds as at 31 December 2022:

9. Risks associated with financial instruments

The Sub-Funds are exposed to risks which includes market risk, credit risk and liquidity risk arising from the financial instruments it holds. The ICAV may use derivatives and other instruments in connection with its risk management activities.

The Sub-Funds have in place guidelines that set out its overall business strategies and its general risk management philosophy and have established processes to monitor and control economic hedging transactions in a timely and accurate manner. The Investment Manager employs a risk management process to monitor and control position risk in a timely and accurate manner. Global exposure is calculated using the commitment approach.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

9. Risks associated with financial instruments (continued)

(a) Market risk

Market risk arises mainly from uncertainty about future prices of financial instruments held. It represents the potential loss the Sub-Funds might suffer through holding market positions in the face of price movements.

The ICAV is exposed, particularly in its equity assets, to market risk. The ICAV invests in securities traded on global markets and market risk is a risk to which exposure is unavoidable.

Market risk comprises of market price risk, currency risk, interest rate risk and concentration risk.

(i) Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting equity instruments traded in the market.

As the majority of the ICAV's investments are carried at fair value with fair value changes recognised in the Statement of Comprehensive Income, all changes in market conditions will directly affect net income. The risk is mitigated through diversification of the portfolio in investments in various geographic zones and industries.

The investment strategy of the ICAV is not to replicate a market index and therefore correlation between the return from the ICAV and any market index is likely to vary. As a result, it is appropriate to use the financial year end portfolio as a risk variable in any market sensitivity analysis.

To illustrate the sensitivity of the portfolio based on a reasonably possible estimate of market price movements for a financial year, if the price of each of the equity securities to which the ICAV had exposure had increased by 5%, whilst the foreign currency rates held constant, there would have been the following approximate increases in net assets attributable to holders of redeemable participating shares:

	31 December 2022	31 December 2021
	USD	USD
SIM US High Yield Opportunities Fund	345,386	284,655
Coho ESG US Large Cap Equity Fund	26,444,516	15,227,052
Orchard US Small Cap Value Fund	13,796,612	16,381,108
NCG US Small Cap Growth Fund ¹	826,028	-

¹NCG US Small Cap Growth Fund launched on the 11 October 2022.

A decrease by 5% would have resulted in an equal but opposite effect on net assets attributable to holders of redeemable shares by the amounts shown above, on the basis that all other variables remained constant.

(ii) Currency risk

Currency risk is the risk that the ICAV's operations or the NAV of the ICAV will be affected by changes in exchange rates and regulatory controls on currency movements.

The ICAV may employ techniques and instruments intended to provide protection against exchange rate risks in the context of the management of its assets and liabilities, for example where there is a difference between the date an investment purchase or sale is entered into and the date when settlement of the proceeds occurs. When the ICAV enters into a transaction which will involve the buying or selling of foreign currency in order to complete a transaction, a forward contract may be entered into at the same time as the initial transaction in order to eliminate exchange rate risk. The ICAV may also enter into forward contracts to hedge the foreign exchange risk implicit in the value of portfolio securities denominated in a currency other than the ICAV's base currency, USD.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

9. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(ii) Currency risk (continued)

The tables below show the currency risk of the Sub-Funds at 31 December 2022.

SIM US High Yield Opportunities Fund		31 December 2022

	-	4,892	-	4,892	245

NCG US Small Cap Growth Fund is not exposed to foreign currency risk as at 31 December 2022.

A strengthening of 5% of the ICAV's base currency against the currencies in the above tables would have resulted in losses to the amounts shown in the Sensitivity of Net Exposure column. A weakening of the base currency against these currencies would have resulted in an equal but opposite effect.

The tables below show the currency risk of the Sub-Funds at 31 December 2021.

(iii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Interest rate risk arises when the ICAV invests in interest bearing financial instruments.

The tables below show the interest rate risk of the Sub-Funds at 31 December 2022.

The sensitivity analysis below is based on a change in one variable while holding all other variables constant. In practice all other variables are unlikely to remain constant, and changes in some of the variables may be correlated. In addition, as the analysis is based on historical data it cannot take account of future rate movements. The market price information represents a hypothetical outcome and is not intended to be predictive.

As at 31 December 2022, a 1% change in interest rates would have an impact on net assets attributable to holders of redeemable shares and cause an increase/(decrease) in net assets attributable to holders of USD1,195,597 (31 December 2021: USD1,437,956) for SIM US High Yield Opportunities Fund. There were no interest rate exposure for Coho ESG US Large Cap Equity Fund, Orchard US Small Cap Value Fund and NCG US Small Cap Growth Fund as the Sub-Funds does not invest into fixed interest rate positions (31 December 2020: none).

As of 31 December 2022 roughly 10% (31 December 2021: 7%) of the SIM US High Yield Opportunities Fund's financial assets were held in non-interest-bearing assets. Interest-bearing financial assets are bonds listed in regulated markets. As a result, the Sub-Fund is subject to exposure to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The weighted average duration of interest bearing securities on SIM US High Yield Opportunities Fund is 4.37 years (31 December 2021: 5.03 years). There were no bonds as at 31 December 2022 (31 December 2021: nil) in Coho ESG US Large Cap Equity Fund, Orchard US Small Cap Value Fund and NCG US Small Cap Growth Fund.

(b) Credit risk

Credit risk arises where there is a possibility that a loss may occur from the failure of another party to fulfil its duties according to the terms of a contract. The ICAV will also be exposed to credit risk on parties with whom they trade securities and may also bear the risk of settlement default. The ICAV may also be exposed to credit risk on issuers in which the ICAV invests in respect of a default in payment of dividends declared by the issuer. The Investment Managers seek to minimise concentrations of credit risk by undertaking transactions with various numbers of counterparties on recognised exchanges.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

9. Risks associated with financial instruments (continued)

(b) Credit risk (continued)

In choosing and appointing a sub-custodian as a safe keeping agent, the Depositary exercises care and diligence to ensure that the sub-custodian has and maintains the expertise, competence and standing appropriate to discharge the responsibilities concerned. These criteria are monitored by the Depositary on an ongoing basis. As at 31 December 2022, RBC Investor Services Bank S.A., Dublin Branch has a credit rating of AA- with Standard & Poor's (31 December 2021: AA- with Standard & Poor's).

As at 31 December 2022, the SIM US High Yield Opportunities Fund had exposure to the following counterparties and their credit rating are as follows: Clearstream Banking SA (AA), Royal Bank of Canada (AA-) and The Bank of New York Mellon (AA-). As at 31 December 2022, all credit ratings are from Standard & Poor's (31 December 2021 : Citibanamex (Baa1), Citibank Europe Plc, France (A+), Citibank Europe Plc Greece (A+), Citibank Europe Plc UK branch (A+), Citibank Europe Plc, Germany branch (A+), Citibank NA – Market UK (A+), Clearstream Banking SA (AA), Danske Bank A/S (A), HSBC Bank Australia Ltd (A+), Nordea Bank Abp (AA-), Raiffeisen Bank International AG (A-), Royal Bank of Canada (AA-), Standard Chartered Bank (HK) Ltd (A), Standard Chartered Bank (THAI) Plc (BBB+), Standard Chartered Bank Plc (BBB+) and The Bank of New York Mellon (AA-). As at 31 December 2021, all credit ratings are from Standard & Poor's.

As at 31 December 2022 and 31 December 2021, the Coho ESG US Large Cap Equity Fund had exposure to the following counterparty and its credit rating are as follows: The Bank of New York Mellon (AA-). The credit rating is from Standard & Poor's.

As at 31 December 2022 and 31 December 2021, the Orchard US Small Cap Value Fund had exposure to the following counterparty and its credit rating are as follows: The Bank of New York Mellon (AA-). The credit rating is from Standard & Poor's.

As at 31 December 2022, the NCG US Small Cap Growth Fund had exposure to the following counterparty and its credit rating are as follows: The Bank of New York Mellon (AA-). The credit rating is from Standard & Poor's.

The credit risk on liquid funds is mitigated through the use of counterparties or banks with high credit ratings assigned by international credit-rating agencies. The carrying amount of financial assets recognised in the financial statements, which is net of impairment losses, represents the ICAV's maximum exposure to credit risk, without taking into account collateral or other credit enhancements held.

Substantially all of the investments and cash of the Sub-Funds are held by the Depositary, and its sub-custodians, on behalf of the Sub-Funds. The investments are clearly segregated from the Depositary's own assets. However, bankruptcy or insolvency of the Depositary, or one of its sub-custodians, could cause the Sub-Fund's rights with respect to assets held by the Depositary or sub-custodian to be delayed.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

9. Risks associated with financial instruments (continued)

(b) Credit risk (continued)

At 31 December 2022, SIM US High Yield Opportunities Fund held bonds with external credit ratings ranged between 'BBB-' through to 'CCC-':

S&P credit rating	percentage of total bonds
BBB-	3.60
BB	34.70
B	45.80
CCC	4.90
not rated	11.00
Total	100.00

At 31 December 2021, SIM US High Yield Opportunities Fund held bonds with external credit ratings ranged between 'BBB-' through to 'CCC-':

S&P credit rating	percentage of total bonds
BBB-	2.58
BB	36.95
B	44.92
CCC	6.23
not rated	9.32
Total	100.00

(c) Liquidity risk

Liquidity risk is the risk that the ICAV will encounter difficulty in realising assets or otherwise raising funds to meet commitments. Not all securities or instruments invested in by the ICAV will be listed or rated and consequently liquidity may be low. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. The ICAV may also encounter difficulties in disposing of assets at their amounts approximating fair values due to adverse market conditions leading to limited liquidity.

Substantial redemptions at the option of shareholders may necessitate liquidation of investments. It is possible that losses may be incurred due on such liquidations, which might otherwise not have arisen.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

10. Efficient portfolio management

From time to time, the SIM US High Yield Opportunities Fund and the Coho ESG US Large Capital Equity Fund may employ investment techniques and derivative instruments for efficient portfolio management purposes, subject to the conditions and within the limits laid down by the Central Bank. During the year, the SIM US High Yield Opportunities Fund and the Coho ESG US Large Capital Equity Fund entered into forward contracts for the purpose of efficient portfolio management. Gains and losses from those forward contracts are disclosed in the Statement of Comprehensive Income. Please refer to the Schedule of Investments for a full list of exposures from these forward contracts held on 31 December 2022.

11. Fair value measurements

IFRS 13, "Fair Value Measurement", requires a fair value hierarchy for inputs used in measuring fair value that classify investments according to how observable the inputs are. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the ICAV. Unobservable inputs reflect the ICAV's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is categorised into three levels based on the inputs as follows:

Level 1 - Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the ICAV has the ability to access at the measurement date;

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active; and

Level 3 - Inputs that are unobservable.

The following table analyses within the fair value hierarchy each Sub-Fund's financial assets measured at fair value as at 31 December 2022:

SIM US High Yield Opportunities Fund	Total USD	(Level 1) USD	(Level 2) USD	(Level 3) USD

Total	327,622,166	327,622,166	-	-

For those instruments which have significant unobservable inputs (Level 3), the amendment requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the period, purchases, sales issues and settlements. The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the ICAV. The ICAV considers observable data to be that market data that is readily available, regularly distributed or updated and reliable.

Assets and liabilities not carried at fair value through profit or loss

The following table presents the movement in Level 3 instruments for the financial year ended 31 December 2022 and 31 December 2021.

SIM US High Yield Opportunities Fund	Unquoted securities at fair value through profit or loss	
	31 December 2022 USD	31 December 2021 USD
Opening balance	1,251,261	1,576,495
Total realised gains	(9,089)	652,855
Total movement in unrealised (losses)/gains	(486,899)	15,678
Purchases	1,011,745	1,235,583
Sales	(267,803)	(1,126,280)
Transfers into or (out) of Level 3	1,615,409	(1,103,070)
Closing balance	3,114,624	1,251,261

The following table presents the transfer between levels for the year ended 31 December 2022.

SIM US High Yield Opportunities Fund	Level 1 USD	Level 2 USD	Level 3 USD
Transfers between Level 1, Level 2 and Level 3:			
Bond securities	-	(1,615,409)	1,615,409

The bond securities transferred out of Level 2 relate to positions whose trading was inactive as at 31 December 2022 but was actively traded as at 31 December 2021. The valuation inputs for this security were not therefore based on market observable inputs and resulted in the reclassification to Level 3.

The following table presents the transfer between levels for the year ended 31 December 2021.

SIM US High Yield Opportunities Fund	Level 1 USD	Level 2 USD	Level 3 USD
Transfers between Level 1, Level 2 and Level 3:			
Bond securities	-	1,103,070	(1,103,070)

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

11. Fair value measurements (continued)

Assets and liabilities not carried at fair value through profit or loss (continued)

The bond securities transferred out of Level 3 relate to positions whose trading was inactive as at 31 December 2020 but was actively traded as at 31 December 2021. The valuation inputs for this security were based on observable market inputs therefore transferred out from Level 3 to Level 2.

There were no transfers between levels during the year ended 31 December 2022 for Coho ESG US Large Cap Equity Fund, Orchard US Small Cap Value Fund and NCG US Small Cap Growth Fund (31 December 2021: none).

The table below sets out information about significant unobservable inputs used at 31 December 2022 in measuring financial instruments categorised as Level 3 in the fair value hierarchy.

Orchard US Small Cap Value Fund

Description	Fair value at 31 December 2022	Valuation Technique	Significant Unobservable Inputs	Sensitivity to changes in significant unobservable inputs
USD				
Other Transferable Securities: Equities				
Contra Ligand Pharmace Npv	-	N/A	Stale priced per market data	N/A

SIM US High Yield Opportunities Fund

Description	Fair value at 31 December 2022	Valuation Technique	Significant Unobservable Inputs	Sensitivity to changes in significant unobservable inputs
USD				
Other Transferable Securities: Bonds

Nova Austral SA 12% 26/11/2026	149,320	N/A	Stale priced per market data	N/A

The table below sets out information about significant unobservable inputs used at 31 December 2021 in measuring financial instruments categorised as Level 3 in the fair value hierarchy.

SIM US High Yield Opportunities Fund

Description	Fair value at 31 December 2021	Valuation Technique	Significant Unobservable Inputs	Sensitivity to changes in significant unobservable inputs
USD				
Other Organised Markets: Bonds				
Secure Energy Services Inc 7.25% 30/12/2026	1,251,261	N/A	Stale priced per market data	N/A

For equities, increases in the EBITDA multiple and control premium inputs would each lead to an increase in estimated value. However, an increase in the discount for lack of marketability would lead to a decrease in value. For bonds, a change to the inputs of the formula would result in a change to the valuation.

Cash and cash equivalents are classified as Level 1 and all other assets and liabilities not carried at fair value are classified as Level 2.

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

11. Fair value measurements (continued)

Assets and liabilities not carried at fair value through profit or loss (continued)

Assets and liabilities not carried at fair value are carried at amortised cost. Their carrying values are a reasonable approximation of fair value.

12. Cash and cash equivalents

Cash balances are held by RBC Investor Services Bank S.A. Dublin Branch (31 December 2021: RBC Investor Services Bank S.A. Dublin Branch). As at 31 December 2022 and 31 December 2021, the following are the cash held at bank:

¹NCG US Small Cap Growth Fund launched on the 11 October 2022.

18. Significant events during the financial year

On the 19 January 2022, the Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank. The Supplement was updated for the inclusion of the GBP Hedged Institutional Class (Cap) share class and confirmation that the Sub-Fund would commence hedging transactions.

On the 25 January 2022 the Manager announced that, subject to regulatory approval, it will become a member of the Waystone Group.

On the 31 January 2022, the ICAV's Instrument of Incorporation ("IOI") was updated due to the Investment Limited Partnerships (Amendment) Act 2020 amending the Irish Collective Asset-management Vehicles Act 2015 which required a UCITS ICAV to update the objects clauses included within the IOI.

In March 2023, the Directors have noted the developments in Ukraine and the sanctions being imposed on Russia by many countries as a result. Given the absence of exposure in the region, the Board of Directors' view is that those developments and sanctions are unlikely to have a significant direct adverse impact on the ICAV. Nonetheless, since the situation continues to evolve, it remains difficult at this stage to estimate all direct and indirect impacts which may arise from these emerging developments. The Board of Directors continues to monitor the developments closely and to take all the necessary actions.

On the 1 April 2022, the ICAV terminated the Privilège Management SA distributor agreement.

On the 28 April 2022, the Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank. The Supplement was amended for the following changes:

- The investment objective of the Sub-Fund was amended to make it clearer that Sub-Fund has sustainable investments as its objective;
- The inclusion of further information on sustainability indicators and specifically, how the Investment Manager integrates ESG factors into the investment process;
- Information has been included in the Supplement regarding the Investment Manager's consideration of environmental factors and the aim to reduce carbon footprint in the investment process by investing in the equity securities of companies that continuously improve on key environmental metrics; and
- The inclusion of a statement that the Fund is actively managed with reference to the S & P 500 solely by reason of the fact that the S&P 500 is referenced in marketing materials purely for performance comparison purposes.
- The total fixed total expense ratio for the Euro Retail Class was amended from 1.75% to 0.89%

NOTES TO THE FINANCIAL STATEMENTS for the financial year ended 31 December 2022 (continued)

18. Significant events during the financial year (continued)

On the 1 June 2022, the Supplement to the SIM US High Yield Opportunities Fund was noted by the Central Bank. The Supplement was updated to include the USDollar QI (Cap) share class.

NCG US Small Cap Growth Fund was authorised by the Central Bank on the 29 September 2022 and launched on the 11 October 2022.

On the 28 October 2022, the Manager became a member of the Waystone group.

On the 11 November 2022, the updated Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank of Ireland. These changes related to the establishment of the GBP Distribution Class and the GBP Hedged Distribution Class.

On the 18 November 2022, the updated Supplement for the Coho ESG US Large Cap Equity Fund was noted by the Central Bank of Ireland. This change related to the establishment of the SEK (Acc) Retail Class.

On the 1 December 2022, the Central Bank of Ireland noted the Level 2 SFDR Supplement updates for each of the Sub-Funds of the ICAV.

On the 1 December 2022, the Coho ESG US Large Cap Equity Fund was reclassified from an Article 9 fund to an Article 8 fund and the Central Bank of Ireland noted the change in the Funds' Investment Objective.

On the 1 December 2022, the SIM US High Yield Opportunities Fund was reclassified from an Article 6 fund to an Article 8 fund.

On the 12 December 2022, the registered address for the ICAV and Manager were amended to 35 Shelbourne Road, Ballsbridge, Dublin 2 with notifications issued to the Central Bank of Ireland and Companies Registration Office.

On the 20 December 2022, the Central Bank of Ireland noted updated Level 2 SFDR Supplement updates for the Coho ESG US Large Cap Equity Fund.

There were no other significant events occurred during the financial year.

19. Events since the financial year end

On the 19 January 2023, the Prospectus for the ICAV was noted by the Central Bank. The Prospectus was amended for the following changes:

- Cross-Border Distribution Funds Agreement: Candoris B.V. has been appointed to provide facilities required for cross-border distribution services, in respect of the ICAV and its sub-funds, pursuant to a Cross-Border Distribution Funds Agreement between the ICAV, the Manager and Candoris B.V. dated 26 August 2021, as may be amended from time to time.

Effective 27 April 2023, the Central Bank of Ireland noted the EU Taxonomy pre-contractual documents updates for each of the Sub-Funds Supplements of the ICAV.

There were no other significant events since the financial year end.

20. Approval of financial statements

The financial statements were approved and authorised for issue by the Board of Directors on 26 April 2023.

**Supplemental Information (Unaudited)
SIM US High Yield Opportunities Fund
Material Portfolio Changes for the financial year ended 31 December 2022**

Significant portfolio changes are defined as the aggregate purchases of a security exceeding one per cent of the total value of purchases for the period and aggregate sales of a security exceeding one per cent of the total value of sales for the period. At a minimum, the 20 largest purchases and 20 largest sales are to be disclosed.

Remuneration Disclosure

The AIFM has designed and implemented a remuneration policy (the “Policy”) in line with the provisions of S.I. 257 of 2013 European Union (Alternative Investment Fund Managers) Regulations 2013 (the “AIFM Regulations”), S.I. 352 of 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”) and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the “ESMA Guidelines”). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The AIFM’s remuneration policy applies to its identified staff whose professional activities might have a material impact on the ICAV’s risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the ICAV. The AIFM’s policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the AIFM to operate a fully flexible policy, with the possibility of not paying any variable component. When the AIFM pays a variable component as performance related pay certain criteria, as set out in the AIFM’s remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice. The AIFM’s remuneration policy is consistent with, and promotes, sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profile of the funds it manages.

These disclosures are made in respect of the remuneration policies of the AIFM. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the AIFM fully or partly involved in the activities of the ICAV that have a material impact on the ICAV’s risk profile during the financial year to 31 December 2022:

Fixed remuneration	EUR
Senior Management	1,387,113
Other identified staff	-
Variable remuneration	
Senior Management	180,517
Other identified staff	-
Total remuneration paid	1,567,630

No of identified staff – 15

Neither the AIFM nor the ICAV pays any fixed or variable remuneration to identified staff of the Investment Manager.

Securities Financing Transactions Regulation Disclosures (“SFTR”)

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation (“SFTR”) which came into effect on 13 January 2017.

A Securities Financing Transaction (“SFT”) is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

The ICAV did not engage in securities lending transactions during the financial year ended 31 December 2022 (31 December 2021: None). In addition, no SFTs that meet the above definition were held by the ICAV as at 31 December 2022 (31 December 2021: None).

There were no securities and commodities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) as at 31 December 2022 (31 December 2021: None).

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]*

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental – During the period, the Fund promoted good environmental practices through assessing whether an issuer has an environmental policy, has published targets to reduce their carbon footprint or released information regarding their current carbon emissions; and/or is facing any lawsuits, allegations or regulatory breaches relating to environmental concern or neglect, and focusing investments in companies that have these positive environmental characteristics, or if not, remediation programs in place to improve on these characteristics.

Social – During the period, the Fund also promoted good social practices by assessing an issuer's health and safety track record, anti-discriminatory hiring practices, breaches of regulatory requirements, any pending lawsuits and recent proxies that received significant shareholder dissent, and focusing investments in companies that have positive records on these social characteristics, or if not, remediation programs in place to improve on these characteristics.

The above was achieved by the identification of environmental, social, and governance indicators, that have a positive environmental and/or social impact, by the Investment Manager as part of its debt and/or equity picking process through its proprietary research and analysis. In addition, the Investment Manager adhered to the exclusionary principles set out in the Investment Manager's ESG policies and as disclosed in the Supplement under the heading "Investment Policies", sub-paragraph "Investment Strategy".

The Investment Manager's adherence to the above resulted in over 80% of the Fund's investments that are rated by MSCI, being ESG rated as BB or higher. Additionally, for those investments not rated by MSCI, the Investment managers' internal ratings were also BB or higher. MSCI rates the overall Fund portfolio as A.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the period, the Fund used a range of both quantitative and qualitative indicators in determining whether an issuer supports good environmental and social practices. The tools utilized by the Fund to identify investments that align with its philosophy that companies with sustainable business practices have a competitive advantage included its own proprietary research; third party quantitative ESG data provided by MSCI together with its ESG scoring system, and investee company and industry publicly available data.

The Investment Manager focused on: whether an issuer had an environmental policy, had published targets to reduce their carbon footprint or released information regarding their current carbon emissions; is committed to reducing waste; and/or is facing any lawsuits, allegations or regulatory breaches relating to environmental concern or neglect. The Fund also assessed additional indicators specific to an investee company's business and the industry in which it operates, such as water conservation, Co2 thresholds, and environmental remediation commitments. Included in this assessment was the Company's relative ranking in its industry compared to comparable issuers on environmental or social characteristics.

With respect to Social characteristics, the Investment Manager assessed an issuer's health and safety track record, breaches of regulatory requirements, anti-discriminatory hiring practices, any pending lawsuits and recent proxies that received significant shareholder dissent.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

Indicator	Portfolio %	Portfolio Average Score/Rating

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]
The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?** *[include section if the financial product considered principal adverse impacts on sustainability factors]*

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As of 12/31/22

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

[include the note below where the financial product made sustainable investments]

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

0%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments in “#2 Other” include cash positions, cash equivalents and currency forwards (for hedging purposes). Cash over the period averaged approximately 2% of the portfolio. Cash positions were maintained for liquidity purposes and currency forwards were for hedging purposes. there were no minimum safeguards in place for this portion of the portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]*

Environmental – During the period, the Fund promoted good environmental practices through assessing whether an issuer has an environmental policy, has published targets to reduce their carbon footprint or released information regarding their current carbon emissions; and/or is facing any lawsuits, allegations or regulatory breaches relating to environmental concern or neglect, and focusing investments in companies that have these positive environmental characteristics, or if not, remediation programs in place to improve on these characteristics.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

Social – During the period, the Fund also promoted good social practices by assessing an issuer's health and safety track record, anti-discriminatory hiring practices, breaches of regulatory requirements, any pending lawsuits and recent proxies that received significant shareholder dissent, and focusing investments in companies that have positive records on these social characteristics, or if not, remediation programs in place to improve on these characteristics.

The above was achieved by the identification of environmental, social, and governance indicators, that have a positive environmental and/or social impact, by the Investment Manager as part of its debt and/or equity picking process through its proprietary research and analysis. In addition, the Investment Manager adhered to the exclusionary principles set out in the Investment Manager's ESG policies and as disclosed in the Supplement under the heading "Investment Policies", sub-paragraph "Investment Strategy".

The Investment Manager's adherence to the above resulted in over 80% of the Fund's investments that are rated by MSCI, being ESG rated as BB or higher. Additionally, for those investments not rated by MSCI, the Investment managers' internal ratings were also BB or higher. MSCI rates the overall Fund portfolio as A.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

An index has not been designated as a reference benchmark to meet the environmental or social characteristics promoted by the Fund.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8¹, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Coho ESG US Large Cap Equity Fund Legal entity identifier: 635400D4RFO1TH1HS952

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund aimed to promote environmental and social characteristics in accordance with Article 8 of SFDR through its investment selection process. The Investment Manager defined environmental and social characteristics as those environmental, social or governance criteria that have a positive environmental and/or social impact.

¹ Note the Fund transitioned from Article 9 to Article 8 on the 1st of December 2022. The recategorization of the Fund has no impact on the Investment Manager's investment process and ESG integration efforts.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

The Investment Manager promoted the following environmental, social, and governance factors when assessing sustainability performance and risks during the investment selection process to promote the environmental and/or social characteristics below. The Investment Manager promoted low environmental impact and minimization of environmental risks. Based on review of the below environmental characteristics aggregated at the fund level during the reference period, the Investment Manager is satisfied that the characteristics were promoted and met. Please refer to the table at the end of this section.

- Specific environmental factors evaluated by the Investment Manager included a company's policy towards climate change, carbon emissions, air/water pollution and energy efficiency. The Investment Manager sourced numerical data on metrics such as carbon emissions, water, waste, energy consumption, and policy-based information directly from company filings. The data was supplemented by qualitative analysis based on engagement with the company and third-party sources such as CDP, Bloomberg, and MSCI. Relevant metrics include but are not limited to (a) energy intensity per sales (MWh/1m USD sales); (b) greenhouse gas intensity per Sales (mt/1m USD sales); (c) Water Intensity per Sales (cbm/1m USD Sales).

The Investment Manager promoted positive social impact and minimization of social risks. Based on review of the below social characteristics aggregated at the fund level during the reference period, the Investment Manager is satisfied that the characteristics were promoted and met. Please refer to the table at the end of this section.

- From a social perspective, the Investment Manager reviewed company labor standards, its community relations, and its human rights record and policies. The Investment Manager sourced numerical data on metrics such as percent of women in the workforce, safety rates, community spending, and policies related to diversity, human rights, and supply chain audits directly from company filings. The information was supplemented by qualitative analysis based on company engagement and third-party sources such as MSCI, Bloomberg, and Glass Lewis. Relevant metrics include but are not limited to (a) companies with supplier guidelines; (b) companies with human rights policies.

The Investment Manager promoted positive governance practices and minimization of governance risks. Based on review of the below governance characteristics aggregated at the fund level during the reference period, the Investment Manager is satisfied that the characteristics were promoted and met. Please refer to the table at the end of this section.

- In terms of governance, the Investment Manager incorporated an analysis of the company's board composition, long-term sustainability incentives and transparency in disclosure. The Investment Manager also considered the company's leadership, audits and internal controls, compliance with laws and regulations, and shareholder rights. The Investment Manager analyzed these factors with a preference for positive and improving trends when considering individual stocks for purchase in the portfolio. Relevant metrics include but are not limited to (a) companies with 20% or more female directors; (b) companies with 80% or more independent directors.

● **How did the sustainability indicators perform?**

These characteristics promoted by the financial product were met in 2022. This assessment is based on a review of the portfolio characteristics on both an absolute and a relative basis. The assessment is also based on the execution of four pillars of ESG integration adopted by the Investment Manager throughout the year. The four pillars are proprietary scores, materiality maps, engagement, and active ownership.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

As shown in the table² below, based on year-end³ 2022 portfolio holdings and characteristics, the Fund performed in line or better than the broad market index for the relevant ESG characteristics listed below. The Fund chooses to use the S&P 500 benchmark as the broad market index for comparing performance of the characteristics. Please note that the S&P 500 benchmark has not been designated as a reference benchmark for the Fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/22 - 12/31/22.	12/31/2022	Coho ESG US Large Cap Equity Fund	S&P 500	
		Equity Holdings	27	505
	Environmental Factors	Energy Intensity per Sales (MWh/1m USD sales)*	100.46	499.44
		Greenhouse Gas Intensity per Sales (mt/1m USD sales)*	32.59	149.00
		Water Intensity per Sales * (cbm/1m USD sales)	0.64K	39.57K
	Social Factors	Companies with Supplier Guidelines	89%	91%
		Companies with Human Rights Policies	96%	91%
	Governance Factors	Companies with 20% or More Women on Boards	100%	95%
		Companies with 80% or More Board Independence	85%	82%

Other characteristics referenced in disclosure and not included in the table above have been either measured quantitatively in the Investment Manager’s proprietary model or assessed qualitatively in the materiality map for each portfolio company. The Investment Manager also conducts direct company engagement and proxy voting activities to promote improved performance on characteristics evaluated.

● **...and compared to previous periods?**

Not Applicable. This is the Investment Manager’s first report. Performance for characteristics in 2021 is not provided.

² The data is sourced from Bloomberg. The greenhouse gas intensity only includes Scope 1 and Scope 2 per Bloomberg’s methodology. Calculation of fund characteristics are for equity weights excluding cash. Used iShares Core S&P 500 ETF to track S&P 500 Components.

³ For the reference period 2022, the quarterly data was not tracked therefore year-end data is presented. For the reference period 2023, quarterly weighted data will be tracked and presented.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable. The Fund did not have sustainable investment objectives or goals. The Fund did not invest in "sustainable investments" as defined under SFDR and did not take into account the EU Taxonomy criteria for environmentally sustainable economic activities as detailed in this Annex.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
Not Applicable.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*
Details: Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product did not consider principal adverse impacts on sustainability factors.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

What were the top investments of this financial product?

Largest Investments	GICS Sector	% of Assets ⁴	Country

Amgen Inc	Health Care	3.48%	USA
Coca-Cola Co/The	Consumer Staples	3.43%	USA

What was the proportion of sustainability-related investments?

For 2022, on a quarterly-weighted average basis, the Fund allocated 97.26% of its NAV to investments in equity securities of ESG companies that are aligned with E/S characteristics. For further details regarding the definition of ESG companies, please refer to the Investment Strategy section in the Supplement submitted by the Investment Manager.

The asset allocation for this Fund was as follows.

The Fund allocated at least 80% of its NAV, to investments in equity securities of ESG Companies. These investments were categorised as "#1 Aligned with E/S characteristics." The Fund did not commit to invest in sustainable investments. The remaining investments in the Fund were categorised as "#2 Other." Investments that fall under "#2 Other" include cash or other cash equivalents and equity related securities, which include the following or similar types of securities: securities of issuers directly or indirectly in the form of Global depository receipts (GDRs), American depository receipts (ADRs), International depository receipts (IDRs), and European depository receipts (EDRs).

What was the asset allocation?

For 2022, on a quarterly-weighted average basis, the Fund allocated 97.26% of its NAV to investments in equity securities of ESG companies. Of the remainder, 2.88% was held in cash and -0.14% was in currency hedging products managed by RBC on behalf of the Investment Manager.

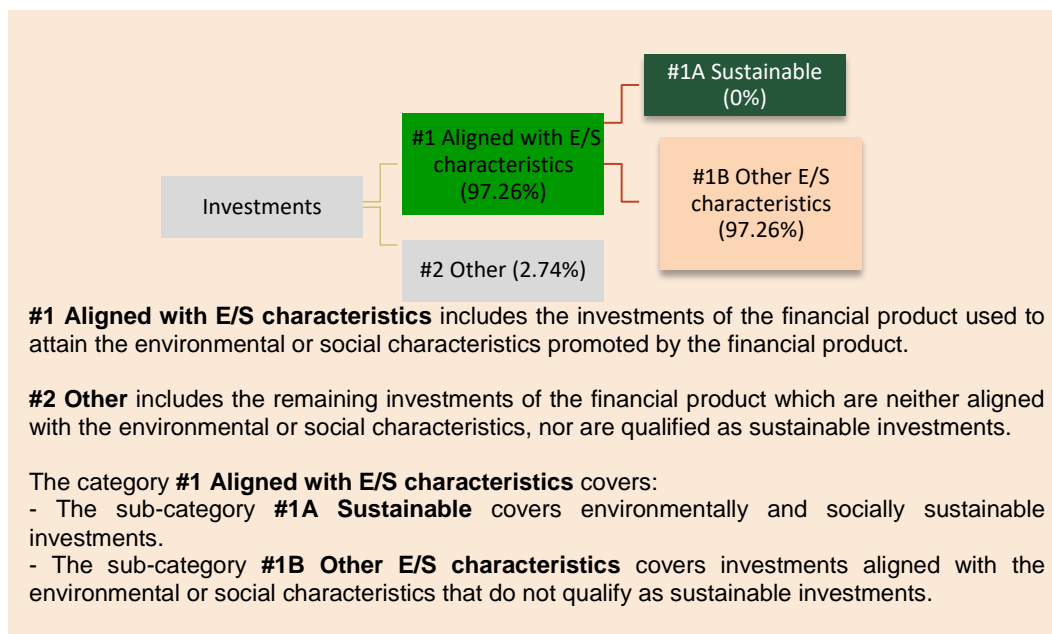

Asset allocation describes the share of investments in specific assets.

⁴ Weightings represent quarterly weighted average for the reference period 1/1/2022 to 12/31/2022.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

In which economic sectors were the investments made?

GICS Sector ⁵	% of Assets ⁶
Health Care	29.24%
Consumer Staples	23.52%
Consumer Discretionary	14.27%
Financials	10.83%
Industrials	9.14%
Information Technology	8.47%
Communication Services	1.78%
Cash & Currency Hedging	2.74%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not invest in sustainable investments with an environmental objective which are aligned with EU Taxonomy under the Taxonomy Regulation. As a result, the percentage of the Fund's investments that were in economic activities that qualify as environmentally sustainable was 0%.

⁵ The Investment Manager used GICS sectors to align with the existing client reporting. GICS sector represent 2022 classifications. GICS sector changes in March 2023 were not reflected.

⁶ Weightings represent quarterly weighted average for the reference period 1/1/2022 to 12/31/2022.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

● Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹?

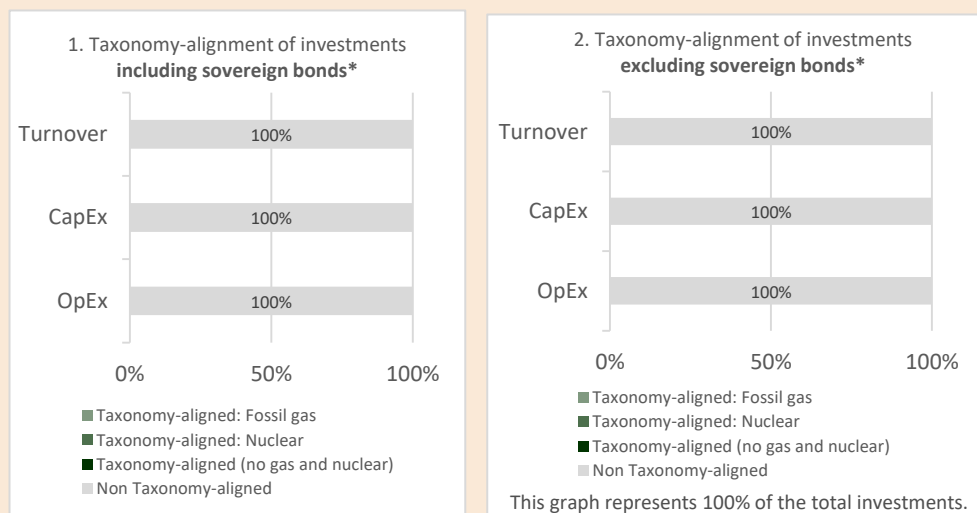

Yes

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in environmentally sustainable economic activities was 0% of NAV, which comprised of 0% of NAV in transitional and 0% of NAV in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund did not make any sustainable investments, the share of sustainable investments with an environmental objective that were aligned with the EU Taxonomy was 0% of the NAV.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0% of NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

For 2022, on a quarterly-weighted average basis, 2.88% was in cash and -0.14% was in currency hedging instruments.

Under #2 Other, and for defensive purposes, the Fund may keep up to 20% of its Net Asset Value in cash or cash equivalent instruments such as short-term government obligations and fixed income government bonds with a minimum rating of Aa+ (Moody's, Fitch, S&P). The Investment Manager may also invest up to 20% of its Net Asset Value in equity related securities in circumstances where direct exposure to certain securities is uneconomic, impractical or not possible. Equity related securities include the following or similar types of securities: securities of issuers directly or indirectly in the form of Global depository receipts (GDRs), American depository receipts (ADRs), International depository receipts (IDRs), and European depository receipts (EDRs).

The Investment Manager used its discretion as to when to invest in these asset classes, based on conditions in equity markets and will do so with the aim of reducing the effects of the volatility of equity markets on the Fund's portfolio and preserving the capital of the Fund. Given the nature of such investments, there was no minimum environmental or social safeguards. Although the basic precondition used in the selection of the Fund's assets was the alignment to the E/S characteristics, there may be occasions when this was not the case.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager consistently executed the four pillars of ESG integration during the reference period to measure and promote the ESG characteristics described in the previous section.

1. The Investment Manager maintained and updated the proprietary quantitative model for the following reasons:
 - a. To assess performance on sustainability for companies in the Investment Manager's portfolios and investable universe;
 - b. To review metric-based and policy-based factors included in the model for data quality control purposes;
 - c. To identify potential ESG issues, concerns or areas of improvement for further qualitative ESG research and engagement. The Investment Manager performed materiality assessments and prepared qualitative materiality maps for portfolio holdings; used these as a basis to further assess performance on sustainability and to inform engagement.
2. The Investment Manager conducted engagement calls with portfolio holding companies on material ESG issues to obtain additional research insights, encourage positive change for the ESG characteristics promoted, and to discuss any material controversies. Through regular meetings and discussions with companies, the Investment Manager actively sought increased transparency by encouraging more frequent and robust disclosure and the establishment of tangible ESG goals. In 2022, the Investment Manager engaged with 31 companies.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

3. The Investment Manager took an active and responsible approach to proxy voting by using customized ESG proxy voting guidelines for casting votes, when required. The Investment Manager believes thoughtful and responsible voting promotes board and management behaviour that should, over the long term, minimize risks for the underlying companies and translate into strong shareholder returns.

In 2022, the Investment Manager completed proxy reviews and voted proxies for 26 companies. In addition, the company discussed proxy voting matters during engagement calls referenced above.

In 2022, the Investment Manager updated the customized ESG proxy voting guidelines, an annual process performed in advance of the upcoming proxy season to reflect proprietary corporate governance views, new proxy voting topics, and best practices for governance and sustainability. For director elections, the Investment Manager introduced additional sustainability and diversity factors that will be considered to strengthen board accountability for these matters. As it relates to executive compensation, the Investment Manager included additional specific compensation metrics evaluated for say-on-pay proposals to continue to promote a strong link between pay and performance. To further expand shareholder rights, the Investment Manager lowered the threshold when voting against shareholder proposals concerning the right to call special meetings from 25% to 20%. And finally, the Investment Manager will review the nature and prescriptive requirements of environmental and social shareholder proposals to ensure they are in the best interest of shareholders.

How did this financial product perform compared to the reference benchmark?

An index was not designated as a reference benchmark to meet the environmental or social characteristics promoted by the Fund.

- **How does the reference benchmark differ from a broad market index?**
Not applicable, as above.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable, as above.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable, as above.
- **How did this financial product perform compared with the broad market index?**
Please refer to the table in the first section.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Orchard US Small Cap Value Fund **Legal entity identifier:** 549300JWA1NJDGWP0E37

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Orchard Capital Management LLC promoted environmental and social characteristics in accordance with Article 8 of SFDR through its investment selection process. The Investment Manager defines environmental and social characteristics as those environmental, social or governance criteria that have a positive environmental and/or social impact. In 2022 the fund began a ESG Outreach Campaign with all investments held in fund to discuss their ESG scores. Meetings with executives have been conducted with a focus on disclosure and improvement of ESG scoring. Orchard collaborated with Bloomberg (ESG Data Provider) to advocate for additional scoring and reporting to expand reach and influence.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

● ***How did the sustainability indicators perform?***

While the industries and the portfolio is mostly scored, reporting remains fragmented. Less than 9% of the 33 Environmental measures in the 36 stock portfolio are reported. We have taken a more narrow view as a result and are using taxonomy where we can find data. We feel more data points will be available as ESG is rolled out more broadly in the US.

The sustainability indicators we were able to find consistency are listed below and in the below dashboard.

DNSH Mitigation which provides an estimated pass rate for Do No Significant Harm (DNSH) to the climate change mitigation environmental objective of the EU Taxonomy, using a combination of the company's policies, processes and quantitative measures that match the requirements of the regulation.

DNSH Adaptation which provides the estimated pass rate for DNSH to the climate change adaptation environmental objective of the EU Taxonomy, using a combination of the company's policies, processes and quantitative measures that match the requirements.

DNSH Water provides the estimated pass rate for DNSH to protection of water and marine resources environmental objective of the EU Taxonomy, using a combination of the company's policies, processes and quantitative measures that match the regulation.

DNSH Waste provides the estimated pass rate for DNSH to the circular economy environmental objective of the EU taxonomy, using a combination of the company's policies, processes and quantitative measures that match the regulation.

DNSH Biodiversity provides the estimated pass rate for the DNSH to the protection and restoration of biodiversity and ecosystems environmental objective and ecosystems environmental objective of the EU Taxonomy, using a combination of the company's policies, processes and quantitative measures that match the regulation.

DNSH Waste provides the estimated pass rate for DNSH to the circular economy environmental objective of the EU Taxonomy, using a combination of the company's policies, processes and quantitative measures that match the regulation.

The Average DNSH score is the average of the six Taxonomy Scores. The Taxonomy Scores are the weighted averages of the portfolio versus the US Small Cap Value Index Bloomberg Industry Group averages.

There are many positions held over the period that have negative ESG performance relative to the fund's benchmark industry group averages. All companies are contacted as part of Orchard's ESG Outreach Campaign where the analysts will speak directly to company executives on their scoring. Negative scoring is not a fundamental reason for disinvestment.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

- **...and compared to previous periods?**

Not Applicable, this is the first year of reporting.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

Not Applicable

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

What were the top investments of this financial product?

For Period of January 1, 2022 to December 31, 2022

What was the proportion of sustainability-related investments?

Not Applicable

What was the asset allocation?

The Fund allocated 93% of its assets to equity and equity-like securities. These investments are categorized as "#1 Aligned with E/S characteristics". The Fund does not commit to making sustainable investments. The remaining investments in the Fund can be categorized as "#2 Other" at 7% which is an investment in cash and/or cash equivalents.

In which economic sectors were the investments made? [include information referred to in Article 54 of this Regulation]

2022 quarterly averages of GICS Sectors as of December 31, 2022

GICS Sector	2022 Quarterly Average
Communication Services	8.98%
Consumer Discretionary	7.24%
Consumer Staples	3.03%
Energy	2.54%
Financials	33.63%
Health Care	8.53%
Industrials	16.78%
Information Technology	1.82%
Materials	7.37%
Real Estate	3.09%
Cash and Cash Equivalents	6.98%

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Asset allocation describes the share of investments in specific assets.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

[Include only relevant boxes, remove irrelevant ones for the financial product]

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes: *[specify below and details in the graphs of the box]*

In fossil gas

In nuclear energy

No

- As of December 31, 2022, the fund did invest in companies that have activities in fossil gas with measured fossil fuel operations revenue which equated to a weighted average of 3% of the portfolio. The portfolio did not have exposure to nuclear energy related activities. The Investment Manager has not calculated the degree to which these activities comply with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not Applicable

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

[include note only for financial products referred to in Article 6 of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

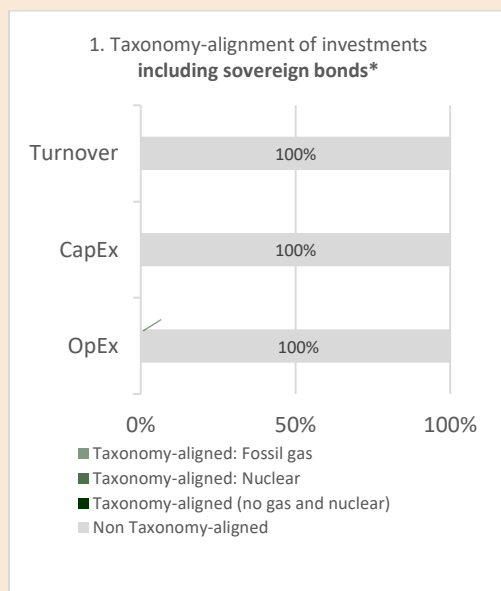

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and / or nuclear energy Taxonomy-aligned economic activities during the reference period]

As of December 31, 2022 there was no information available for the below Turnover, CapEx, or OpEx for the below graph. There was 3% asset weighted Fossil Fuel Operations Revenue in the portfolio. There was no nuclear energy Taxonomy-aligned economic activities during the period.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures**

What was the share of investments made in transitional and enabling activities?

0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? *[include where at least one previous periodic report was provided]*

0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The fund holds cash as part of its liquidity management and does not measure the environmental or social safeguards on these investments. Under #2 Other, the Fund kept 7% of its Net Asset Value in cash and cash equivalents. All remaining securities went through the Investment Committee’s selection and ESG process.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]*

[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]

In 2022 the fund began a ESG Outreach Campaign with all investments held in fund to discuss their ESG scores. Orchard collaborated with Bloomberg (fund’s ESG Data Provider) to advocate for additional scoring and reporting to expand reach and influence.

Meetings with our investment executives have been conducted with a focus on disclosure and improvement of ESG scoring. The company will receive an ESG summary page, and we discuss their scores and look to improve scores where appropriate and advocate for more disclosure of data points.

How did this financial product perform compared to the reference benchmark?

Product name: NCG US Small Cap Growth Fund Legal entity identifier: 6354001ANBW4TC1L1O92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental:

1. Promoted climate change – The Investment Manager evaluated companies for whether their business model was impacted by varying climate change factors such as: environmental risk exposure (including GHG emissions), product carbon footprint, raw material sourcing, energy management, and climate change risk/vulnerability.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

Social:

1. Employee engagement, diversity & inclusion - Included employee recruitment, development & retention and demographics (gender and race/ethnicity);
2. Customer privacy and cybersecurity - Included data breaches, litigious actions due to cyber breaches; and
3. Human rights - included human rights violations, child labor, health and safety standards, working conditions.

● **How did the sustainability indicators perform?**

Sustainability indicators, using Ethos methodology, at portfolio-level as of 31 December 2022;

- Weighted average of scope 1,2 & 3 GHG emissions: 231,802 metric tonnes across the whole portfolio, 80% better than US Small Cap Growth Index
- Exposure to fossil fuel sectors: 0% exposure to fossil fuels
- Energy management: 0% share of energy exposure to coal, natural gas, oil and other non-renewable energy sources.
- % of renewable energy: 60.2% energy from renewable sources
- Industry exposure to physical impacts of climate change rating: 5.22/10 (10 being the highest) (US Small CapGrowth Index is 5.32/10)
- Average ratio of female to male board members in investee companies. "Board" means the administrative, management or supervisory body of a company: 24% , (Russel 2000 Growth Index is 26.75%)
- Employee ratings on diversity: 71.23/100 (US Small Cap Growth Index is 69.7)
- Public controversies and customer privacy: 1.95 public controversies total. 9.94/10 rating on public controversies in customer privacy. (US Small Cap Growth Index, 1.59 controversies, 9.97/10 controversies in customer privacy)
- Quality of disclosures on customer privacy: 3.91/10 rating, (US Small Cap Growth Index- 4.63/10 rating)
- Number of human rights violations: 0% of investee companies have violations of UN Global Compact principles & 0% of overall portfolio exposure to identified cases of severe human rights incidents.

● **...and compared to previous periods?**

2022 was the first reporting period for NCG.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

This product does not consider PAIs on sustainability factors.

What were the top investments of this financial product?

NCG Top Investments as of December 31, 2022

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **[complete]**

Transportation	6.0%
Utilities	<0.1%

As of December 31, 2022

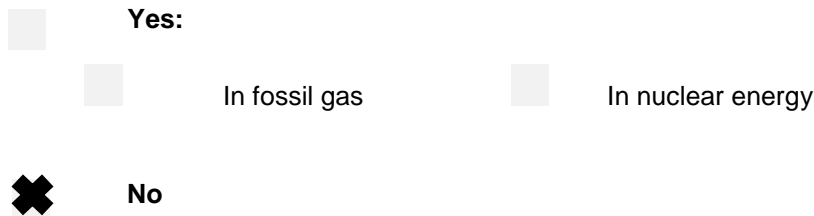

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹?

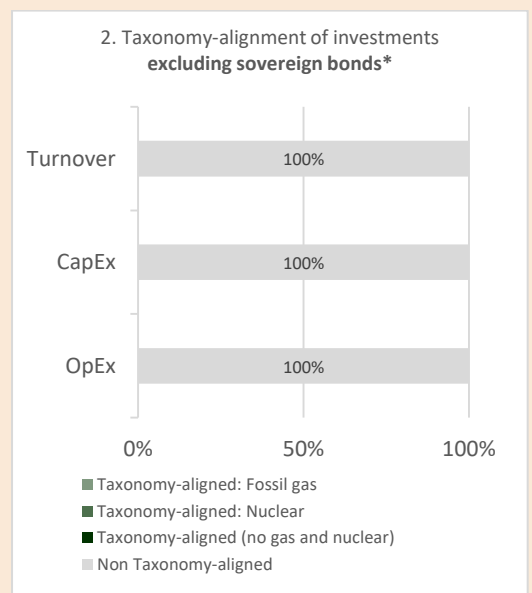

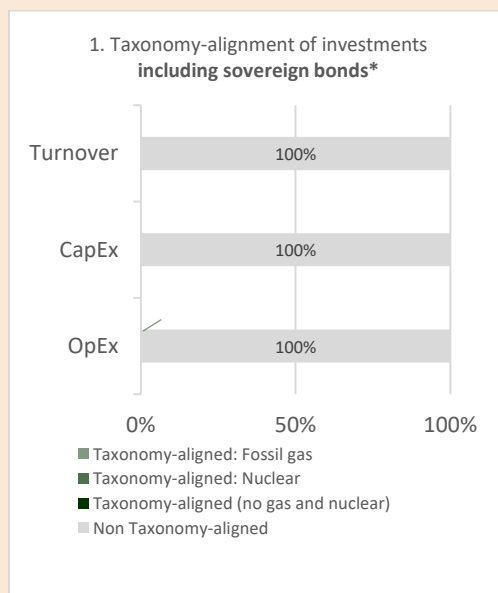

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

[include note only for financial products referred to in Article 6 of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in environmentally sustainable economic activities is currently 0% of NAV, which comprises of 0% of NAV in transitional and 0% of NAV in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – this Fund does not make any sustainable investments.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Under #2Other, the Fund kept 5.6% of its Net Asset Value in cash or money market instruments. There were no minimum environmental or social safeguards. All remaining securities went through the Funds ESG process.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager utilises both internal and external data as part of its ESG screening and analysis process.

The Fund has adhered to its binding elements of the investment strategy, set out in the Annex II, used to select the investments to attain the environmental and social characteristics have been met. Part of the pre-investment process is ESG Screening and Analysis which is currently conducted in-house by reviewing publicly available ESG information, third party data through our research provider, Ethos, and direct engagement with management teams. The Investment Manager leverages its strong relationships with the management teams within investee companies to understand material ESG factors applicable to each company, and the commitment to them by such management teams. Where material ESG issues are identified and reliable data is available, the impact of these ESG issues are incorporated into our broader company evaluation. This may lead to a decision not to invest or divest from an investment.

Sustainable Finance Disclosure Regulations ("SFDR") and Taxonomy Regulations (continued)

The Fund had 0% exposure to fossil fuel companies, defined as companies active in the fossil fuel sector" means companies that derive any revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

The fund had 0% exposure to controversial weapons, defined as the share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The fund had 0% exposure to companies which involve themselves or through entities such companies control, which produce or are involved in the following industries; tobacco, adult entertainment, alcohol and gambling.

How did this financial product perform compared to the reference benchmark?

N/A

● How does the reference benchmark differ from a broad market index?

N/A

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

● How did this financial product perform compared with the reference benchmark?

N/A

● How did this financial product perform compared with the broad market index?

N/A
